

UNIVERSITY OF CALICUT

Abstract

General & Academic IV - Faculty of Science - Scheme and Syllabus of BSc Information Technology Honours Programme-in tune with the CUFYUGP Regulations 2024, with effect from 2024 admission - Approved-Subject to ratification by the Academic Council-Implemented- Orders Issued

| | G & A - IV - J | |
|-------------------------|----------------|---|
| U.O.No. 10406/2024/Admn | | Dated, Calicut University.P.O, 01.07.2024 |

- *Read:*-1. U.O.No. 3103/2024/Admn dated 22/02/2024.
 2. Minutes of the online meeting of the Board of Studies in Computer Science and Application UG held on 29/05/2024
 - 3. Remarks of the Dean, Faculty of Science dated 20/06/2024.
 - 4. Orders of the Vice Chancellor in the file of even No and dated 26/06/2024.

<u>ORDER</u>

- 1. The Regulations of the Calicut University Four Year UG Programmes (CUFYUGP Regulations 2024) for Affiliated Colleges, has been implemented with effect from 2024 admission, vide paper read as (1).
- The Board of Studies in Computer Science and Application UG in the meeting held on 29/05/2024, vide paper read as (2), has approved the Scheme and Syllabus of BSc Information Technology Honours Programme in tune with CUFYUGP Regulations 2024, with effect from 2024 admission.
- 3. The Dean, Faculty of Science vide paper read as (3), has approved the minutes of the meeting of the Board of Studies in Computer Science and Application UG held on 29/05/2024.
- 4. Considering the urgency, the Vice Chancellor has approved the minutes of the meeting of Board of Studies in Computer Science and Application UG held on 29/05/2024 and accorded sanction to implement the Scheme and Syllabus of BSc Information Technology Honours Programme in tune with CUFYUGP Regulations 2024, with effect from 2024 admission, subject to ratification by the Academic Council.
- 5. The Scheme and Syllabus of BSC Information Technology Honours Programme in tune with CUFYUGP Regulations 2024 is thus implemented with effect from 2024 admission, subject to ratification by the Academic Council.

Orders are issued accordingly. (Syllabus appended)

B.Sc. Information technology Honours (MAJOR, MINOR AND GENERAL FOUNDATION COURSES)

SYLLABUS

(w.e.f. 2024 admission onwards)

(CUFYUGP Regulations 2024)

PROGRAMME OUTCOMES (PO):

At the end of the graduate programme at Calicut University, a student would:

| Knov | vledge Acquisition: |
|-------|--|
| DO1 | Demonstrate a profound understanding of knowledge trends and their impact on the chosen |
| PUI | discipline of study. |
| Com | munication, Collaboration, Inclusiveness, and Leadership: |
| DOJ | Become a team player who drives positive change through effective communication, |
| PO2 | collaborative acumen, transformative leadership, and a dedication to inclusivity. |
| Profe | ssional Skills: |
| DO3 | Demonstrate professional skills to navigate diverse career paths with confidence and |
| 105 | adaptability. |
| Digit | al Intelligence |
| PO4 | Demonstrate proficiency in varied digital and technological tools to understand and interact |
| 104 | with the digital world, thus effectively processing complex information. |
| Scien | tific Awareness and Critical Thinking: |
| PO5 | Emerge as an innovative problem-solver and impactful mediator, applying scientific |
| 105 | understanding and critical thinking to address challenges and advance sustainable solutions. |
| Hum | an Values, Professional Ethics, and Societal and Environmental Responsibility: |
| PO6 | Become a responsible leader, characterized by an unwavering commitment to human values, |
| 100 | ethical conduct, and a fervent dedication to the well-being of society and the environment. |
| Resea | arch, Innovation, and Entrepreneurship: |
| | Emerge as a researcher and entrepreneurial leader, forging collaborative partnerships with |
| PO7 | industry, academia, and communities to contribute enduring solutions for local, regional, |
| | and global development. |

PROGRAMME SPECIFIC OUTCOMES (PSO):

At the end of the BSc IT Honours programme at Calicut University, a student would:

| PSO1 | Focuses on preparing students for roles pertaining to information Technology |
|------|---|
| PSO2 | Understand the concepts of system architecture, hardware, software and network configuration |
| PSO3 | Acquire logical thinking and problem-solving skills to find solutions in the software domain |
| PSO4 | Design, analyse and develop code-based solutions for the algorithms |
| PSO5 | Address the industry demands and assimilate technical, logical and ethical skills needed for the industry |
| PSO6 | Adapt to emerging trends and tackle the challenges in the software field. |

SPECIALISATION

Minor Courses

BSc Information Technology is a Course designed to mould professionals in the IT field. So it is advisable to the student to opt their minor course from minor /vocational minor courses offered in the same subject to acquire more knowledge in subject area and become a wellequipped professional in IT field

- i. Students in Single Major pathway can choose course/courses from any of the Minor/ Vocational Minor groups offered by any discipline.
- ii. Students in Major with Multiple Disciplines pathway can choose as one of the multiple disciplines, all the three courses from any one of the Minor/ Vocational Minor groups offered by any discipline, including their Major discipline. If they choose one of the Minor/ Vocational Minor groups offered by their Major discipline as the first one of the multiple disciplines, then their choice as the second one of the multiple disciplines should be any one of the Minor/ Vocational Minor groups offered by a discipline other than the Major discipline. If the students choose any one of the Minor/ Vocational Minor groups in IT as given above, then the title of the group will be the title of that multiple discipline.
- (iii). Students in Major with Minor pathway can choose all the courses from any two Minor groups offered by any discipline. If the students choose two Minor groups in IT (three courses from foundations of computing and three courses from foundations of data analytics) as given above, then the title of the Minor will be Computer Science
- (iv). Students in Major with Vocational Minor pathway can choose all the courses from any two Vocational Minor groups offered by any discipline. If the students choose Vocational Minor group in IT as given above, then the title of the Vocational Minor will be Data Science

EVALUATION SCHEME

- 1. The evaluation scheme for each course contains two parts: internal evaluation (about 30%) and external evaluation (about 70%). Each of the Major and Minor courses is of 4-credits. It is evaluated for 100 marks, out of which 30 marks is from internal evaluation and 70 marks, from external evaluation. Each of the General Foundation course is of 3-credits. It is evaluated for 75 marks, out of which 25 marks is from internal evaluation and 50 marks, from external evaluation.
- **2.** The 4-credit courses (Major and Minor courses) are of two types: (i) courses with only theory and (ii) courses with 3-credit theory and 1-credit practical.
 - In 4-credit courses with only theory component, out of the total 5 modules of the syllabus, one open-ended module with 20% content is designed by the faculty member teaching that course, and it is internally evaluated for 10 marks. The internal evaluation of the remaining 4 theory modules is for 20 marks.
 - In 4-credit courses with 3-credit theory and 1-credit practical components, out of the total 5 modules of the syllabus, 4 modules are for theory and the fifth module is for practical. The practical component is internally evaluated for 20 marks. The internal evaluation of the 4 theory modules is for 10 marks.
- **3.** All the 3-credit courses (General Foundational Courses) in IT are with only theory component. Out of the total 5 modules of the syllabus, one open-ended module with 20% content is designed by the faculty member teaching that course, and it is internally evaluated for 5 marks. The internal evaluation of the remaining 4 theory modules is for 20 marks.

| S1. | Nature of | of the Course | Internal Evaluation in Marks | | External | Total |
|-----|--------------------|--------------------------------------|-------------------------------------|---------------------------|-------------------------|-------|
| No. | | | (about 30% | (about 30% of the total) | | Marks |
| | | | Open-ended module / Practical | On the other 4 modules | on 4 modules (Marks) | |
| 1 | 4-credit course | only theory (5 modules) | 10 | 20 | 70 | 100 |
| 2 | 4-credit course | Theory (4 modules) + Practical | 20 | 10 | 70 | 100 |

| 3 | 3-credit | only theory | 5 | 20 | 50 | 75 |
|---|----------|-------------|---|----|----|----|
| | course | (5 modules) | | | | |

1. MAJOR AND MINOR COURSES

1.1. INTERNAL EVALUATION OF THEORY COMPONENT

| Sl. | Components of Internal | Internal Marks for the Theory Part | | | | | |
|-------|-----------------------------------|--|------------|----------|-------------|--|--|
| NO. | Evaluation of Theory | of a Major / Minor Course of 4-credits | | | | | |
| | Part of a Major / Minor Course | Theory | Only | Theory - | + Practical | | |
| | | 4 Theory | Open-ended | 4 Theory | Practical | | |
| | | Modules | Module | Modules | | | |

| | Mid-semester Exam | | | | | | |
| 2 | Seminar/ Viva/ Quiz | 6 | 4 | 3 | - | | |
| 3 | Assignment | 4 | 2 | 2 | - | | |
| | | 20 | 10 | 10 | 20^* | | |
| Total | | 30 30 | | 30 | | | |

^{*}Refer the table in section 1.2 for the evaluation of practical component

1.2. EVALUATION OF PRACTICAL COMPONENT

The evaluation of practical component in Major and Minor courses is completely by internal evaluation.

- Continuous evaluation of practical by the teacher-in-charge shall carry a weightage of 50%.
- The end-semester practical examination and viva-voce, and the evaluation of practical records shall be conducted by the teacher in-charge and an internal examiner appointed by the Department Council.
- The process of continuous evaluation of practical courses shall be completed before 10 days from the commencement of the end-semester examination.
- Those who passed in continuous evaluation alone will be permitted to appear for the endsemester examination and viva-voce.

The scheme of continuous evaluation and the end-semester examination and viva-voce of practical component shall be as given below:

| Sl. No. | Evaluation of Practical Component | Marks for | Weightage |
|---------|---------------------------------------|-----------|-----------|
| | of Credit-1 in a Major / Minor Course | Practical | |

| 1 | Continuous evaluation of practical/ exercise | 10 | 50% |
|---|---|----|-----|
| | performed in practical classes by the students | | |
| 2 | End-semester examination and viva-voce to be | 7 | 35% |
| | conducted by teacher-in-charge along with an | | |
| | additional examiner arranged internally by the | | |
| | Department Council | | |
| 3 | Evaluation of the Practical records submitted for the | 3 | 15% |
| | end semester viva-voce examination by the teacher- | | |
| | in-charge and additional examiner | | |
| | Total Marks | 20 | |

1.3. EXTERNAL EVALUATION OF THEORY COMPONENT

External evaluation carries 70% marks. Examinations will be conducted at the end of each semester. Individual questions are evaluated in marks and the total marks are converted into grades by the University based on 10-point grading system (refer section 5).

| Duration | Туре | Total No. of | No. of | Marks for | Ceiling |
|----------|--------------------|--------------|-----------------|-------------|---------|
| | | | Questions to be | Each | of |
| | | Questions | Answered | Question | Marks |
| | Short Answer | 10 | 8 - 10 | 3 | 24 |
| 2 Hours | Paragraph/ Problem | 8 | 6-8 | 6 | 36 |
| | Essay | 2 | 1 | 10 | 10 |
| | | | | Total Marks | 70 |

PATTERN OF QUESTION PAPER FOR MAJOR AND MINOR COURSES

2. INTERNSHIP

- All students should undergo Internship of 2-credits during the first six semesters in a firm, industry or organization, or training in labs with faculty and researchers of their own institution or other Higher Educational Institutions (HEIs) or research institutions.
- Internship can be for enhancing the employability of the student or for developing the research aptitude.
- Internship can involve hands-on training on a particular skill/ equipment/ software. It can be a short project on a specific problem or area. Attending seminars or workshops related to an area of learning or skill can be a component of Internship.
- A faculty member/ scientist/ instructor of the respective institution, where the student does the Internship, should be the supervisor of the Internship.

2.1. GUIDELINES FOR INTERNSHIP

- 1. Internship can be in IT or allied disciplines.
- 2. There should be minimum 60 hrs. of engagement from the student in the Internship.
- 3. Summer vacations and other holidays can be used for completing the Internship.
- 4. In BSc. IT Honours programme, institute/ industry visit or study tour is a requirement for the completion of Internship. Visit to minimum one national research institute, research laboratory and place of scientific importance should be part of the study tour. A brief report of the study tour has to be submitted with photos and analysis.
- 5. The students should make regular and detailed entries in to a personal log book through the period of Internship. The log book will be a record of the progress of the Internship and the time spent on the work, and it will be useful in writing the final report. It may contain experimental conditions and results, ideas, mathematical expressions, rough work and calculation, computer file names etc. All entries should be dated. The Internship supervisor should periodically examine and countersign the log book.
- 6. The log book and the typed report must be submitted at the end of the Internship.
- 7. The institution at which the Internship will be carried out should be prior-approved by the Department Council of the college where the student has enrolled for the UG (Honours) programme.

2.2. EVALUATION OF INTERNSHIP

- The evaluation of Internship shall be done internally through continuous assessment mode by a committee internally constituted by the Department Council of the college where the student has enrolled for the UG (Honours) programme.
- The credits and marks for the Internship will be awarded only at the end of semester 6.
- The scheme of continuous evaluation and the end-semester viva-voce examination based on the submitted report shall be as given below:

| Sl. No. | Components of Eval | uation of Internship | Marks for | Weightage |
|---------|---------------------------------|--------------------------|------------|-----------|
| | | | Internship | |
| | | | 2 Credits | |
| 1 | Continuous evaluation of | Acquisition of skill set | 10 | 40% |
| | internship through interim | | | |
| 2 | presentations and reports | Interim Presentation and | 5 | |
| | by the committee internally | Viva-voce | | |
| 3 | constituted by the | Punctuality and Log Book | 5 | |
| | Department Council | | | |
| 4 | Report of Institute Visit/ Stud | 5 | 10% | |

| 5 | End-semester viva-voce | Quality of the work | 6 | 35% |

| 8 | Evaluation of the day-to-d | ay records, the report of | 8 | 15% |
| | internship supervisor, and find | nal report submitted for the | | |
| | end semester viva-voce | examination before the | | |
| | committee internally const | ituted by the Department | | |
| | Council | · • | | |
| | | Total Marks | 50 | |

3 MINI PROJECT WORK (Skill Enhancement Course 3 - ITY6FS113

A mandatory mini-project (SEC 3) is scheduled in the VI Semester of the BSc (Honours) Information Technology program. It is designed to cultivate students' research and software development skills. It will serve as a capstone experience, allowing students to bridge the gap between theoretical knowledge acquired in the classroom and its practical application to real-world problems.

Project Selection and Approval:

- Student groups (at most four members) can propose projects in Information Technology or related disciplines.
- Projects can be experimental (building a prototype), theoretical (a research paper), or computational (implementing an algorithm).
- Project proposals must be submitted for prior approval from the Department Council.
- Each project team will be assigned a project supervisor for guidance.

Project Duration:

- The mini-project duration is one semester.
- Minimum engagement: 90 hours per student.

Project Deliverables:

- Two hard copies and one softcopy of a well-structured typed report outlining:
- o Project objectives and requirements analysis
- o System design and architecture
- o Implementation details (including sample code snippets)
- o Test cases and results
- o Conclusion and future work

• A signed undertaking by the student declaring the originality of the work and the absence of plagiarism

plagiarism.

• A certificate from the project supervisor confirming the same.

Evaluation Criteria and Rubrics:

- 1. **Internal Evaluation (25 Marks)** Conducted by the project supervisor throughout the semester. This could involve:
 - **Project Proposal and Planning**
 - Clarity of project goals and objectives.
 - Feasibility of the chosen approach.
 - Quality of system study/literature review and proposed methodology.
 - Clarity of project schedule and division of tasks within the team.
 - Project Progress and Implementation
 - Regular code reviews and adoption of feedback provided by the supervisor.
 - Attendance and active participation in project meetings.
 - Completion of project milestones as planned.
 - Quality of code documentation and adherence to coding standards.

• Interim Presentations

- Effectiveness of communication and presentation skills.
- Clarity of technical details and progress made.
- Ability to answer questions about the project effectively.

| Sl. No | Components of Evaluation of Project | Marks for the Internal Evaluation of Mini project |
|--------|-------------------------------------|---|
| 1 | Project Proposal and Planning | 5 |
| 2 | Project Progress and Implementation | 10 |
| 3 | Interim Presentations | 10 |
| | Total Marks | 25 |

- 2. External Evaluation (50 Marks) Conducted by an external examiner appointed by the University. This will take place at the end of the VIth semester:
 - **Project Report:**
 - **Content:** Completeness, organisation, clarity, and technical accuracy.
 - Structure: Introduction, System Design/literature review, methodology, implementation details, results, discussion, conclusion, future work, and references.
 - **Presentation:** Quality of writing, grammar, and formatting.

• **Project Demonstration**

- **Demonstration:** Ability to showcase the functionality of the project or present the research findings effectively.
- Viva-voce

• **Viva-voce:** Understanding of project concepts, ability to answer questions confidently, and critical thinking skills.

| Sl. No | Components of Evaluation of Project | Marks for the End Semester Evaluation of Mini project |
|----------|--|---|
| 1 | Project Report | 15 |
| 2 | Project Demonstration | 20 |
| 3 | Viva-voce | 15 |
| Total Ma | arks | 50 |

4. PROJECT

4.1. PROJECT IN HONOURS PROGRAMME

- In Honours programme, the student has the option to do a Project of 12-credits instead of three Core Courses in Major in semester 8.
- The Project can be done in the same institution or any other higher educational institution (HEI) or research Centre.
- A faculty member of the respective institution, where the student does the Project, should be the supervisor of the Project.

4.2. PROJECT IN HONOURS WITH RESEARCH PROGRAMME

- Students who secure 75% marks and above (equivalently, CGPA 7.5 and above) cumulatively in the first six semesters are eligible to get selected to Honours with Research stream in the fourth year.
- In Honours with Research programme, the student has to do a mandatory Research Project of 12-credits in semester 8.
- The approved research centres of University of Calicut or any other university/ HEI can offer the Honours with Research programme. The departments in the affiliated colleges under University of Calicut, which are not the approved research centres of the University, should get prior approval from the University to offer the Honours with Research programme. Such

departments should have minimum one faculty member with Ph.D., and they should also have the necessary infrastructure to offer Honours with Research programme.

• A faculty member of the University/ College with a Ph.D. degree can supervise the research project of the students who have enrolled for Honours with Research. One such faculty member can supervise maximum four students in Honours with Research stream.

4.3. GUIDELINES FOR THE PROJECT IN HONOURS PROGRAMME AND HONOURS WITH RESEARCH PROGRAMME

- 1. Project can be in IT or allied disciplines.
- 2. Project should be done individually.
- 3. Project work can be of experimental/ theoretical/ computational in nature.
- 4. There should be minimum 360 hrs. of engagement from the student in the Project work in Honours programme and Honours with Research programme
- 5. The various steps in project works are the following:
 - ➢ Wide review of a topic.
 - > Investigation on a problem in systematic way using appropriate techniques.
 - Systematic recording of the work.
 - > Reporting the results with interpretation in a standard documented form.
 - > Presenting the results before the examiners.
- 7. During the Project the students should make regular and detailed entries in to a personal log book through the period of investigation. The log book will be a record of the progress of the Project and the time spent on the work, and it will be useful in writing the final report. It may contain experimental conditions and results, ideas, mathematical expressions, rough work and calculation, computer file names etc. All entries should be dated. The Project supervisor should periodically examine and countersign the log book.
- 8. The log book and the typed report must be submitted at the end of the Project. A copy of the report should be kept for reference at the department. A soft copy of the report too should be submitted, to be sent to the external examiner in advance.
- 9. It is desirable, but not mandatory, to publish the results of the Project in a peer reviewed journal.
- 10. The project report shall have an undertaking from the student and a certificate from the research supervisor for originality of the work, stating that there is no plagiarism, and that the work has not been submitted for the award of any other degree/ diploma in the same institution or any other institution.

11. The project proposal, the institution at which the project is being carried out, and the project supervisor should be prior-approved by the Department Council of the college where the student has enrolled for the UG (Honours) programme.

4.4. EVALUATION OF PROJECT

- The evaluation of Project will be conducted at the end of the eighth semester by both internal and external modes.
- The Project in Honours programme /Honours with Research programme will be evaluated for 300 marks. Out of this, 90 marks is from internal evaluation and 210 marks, from external evaluation.
- The internal evaluation of the Project work shall be done through continuous assessment mode by a committee internally constituted by the Department Council of the college where the student has enrolled for the UG (Honours) programme. 30% of the weightage shall be given through this mode.
- The remaining 70% shall be awarded by the external examiner appointed by the University.
- The scheme of continuous evaluation and the end-semester viva-voce of the Project shall be as given below:

| Components of Evaluation of Project | Marks for the | Weightage |
|--|---------------|-----------|
| | Research | |
| | Project | |
| | Honours | |
| | programme/ | |
| | Honours with | |
| | Research | |
| | 12 Credits | |
| Continuous evaluation of project work through | 90 | 30% |
| interim presentations and reports by the | | |
| committee internally constituted by the | | |
| Department Council | | |
| End-semester viva-voce examination to be | 150 | 50% |
| conducted by the external examiner appointed by | | |
| the university | | |
| Evaluation of the day-to-day records and project | 60 | 20% |
| report submitted for the end-semester viva-voce | | |
| examination conducted by the external examiner | | |

| Total Marks | 300 | |

| | | (Honours with |
| | | Research programme) |
| | | 12 credits |
| 1 | Skill in doing project work | 30 |
| 2 | Interim Presentation and Viva-Voce | 20 |
| 3 | Punctuality and Log book | 20 |
| 4 | Scheme/ Organization of Project Report | 20 |
| | Total Marks | 90 |

INTERNAL EVALUATION OF PROJECT

EXTERNAL EVALUATION OF PROJECT

| | | Marks for the | |
|--------|---------------------------------------|-------------------------|--|
| | | Research Project | |
| | | (Honours | |
| Sl. No | Components of Evaluation of Project | programme)/ | |
| | | (Honours with | |
| | | Research programme) | |
| | | 12 credits | |
| 1 | Content and relevance of the Project, | | |
| | Methodology, Quality of analysis, | 50 | |
| | and Innovations of Research | | |
| 2 | Presentation of the Project | 50 | |
| 3 | Project Report (typed copy), Log | 60 | |
| | Book and References | 00 | |
| 4 | Viva-Voce | 50 | |
| | Total Marks | 210 | |

5. GENERAL FOUNDATION COURSES

• All the General Foundation Courses (3-credits) in IT are with only theory component.

5.1. INTERNAL EVALUATION

| Sl. No. | Components of Internal | Internal Marks of a General Foundation |
|---------|-------------------------|--|
| | Evaluation of a General | Course of 3-credits in IT |

| | Foundation Course in IT | 4 Theory Modules | Open-ended Module |
|---|-------------------------------|------------------|-------------------|
| 1 | Test paper/ Mid-semester Exam | 10 | 2 |
| 2 | Seminar/ Viva/ Quiz | 6 | 2 |
| 3 | Assignment | 4 | 1 |
| | | 20 | 5 |
| | Total | | 25 |

5.2. EXTERNAL EVALUATION

External evaluation carries about 70% marks. Examinations will be conducted at the end of each semester. Individual questions are evaluated in marks and the total marks are converted into grades by the University based on 10-point grading system (refer section 5).

PATTERN OF QUESTION PAPER FOR GENERAL FOUNDATION COURSES

| | | Total No. of | No. of | Marks for | Ceiling |
|-----------|--------------------|--------------|-----------------|-------------|---------|
| Duration | Туре | Ouestiens | Questions to be | Each | of |
| | | Questions | Answered | Question | Marks |
| | Short Answer | 10 | 8 - 10 | 2 | 16 |
| 1.5 Hours | Paragraph/ Problem | 5 | 4 – 5 | 6 | 24 |
| | Essay | 2 | 1 | 10 | 10 |
| | | | | Total Marks | 50 |

6. LETTER GRADES AND GRADE POINTS

- Mark system is followed for evaluating each question.
- For each course in the semester letter grade and grade point are introduced in 10-point indirect grading system as per guidelines given below.
- The Semester Grade Point Average (SGPA) is computed from the grades as a measure of the student's performance in a given semester.
- The Cumulative GPA (CGPA) is based on the grades in all courses taken after joining the programme of study.
- Only the weighted grade point based on marks obtained shall be displayed on the grade card issued to the students.

| S1. | Percentage of Marks | Description | Letter | Grade | Range of | Class |
|-----|----------------------|-------------|--------|-------|----------|-------|
| No. | (Internal & External | | Grade | Point | Grade | |
| | Put Together) | | | | Points | |

LETTER GRADES AND GRADE POINTS

| 1 | 95% and above | Outstanding | 0 | 10 | 9.50 - 10 | First Class |
|---|--|------------------|----|----|-------------|---------------------|
| 2 | Above 85% and below 95% | Excellent | A+ | 9 | 8.50 - 9.49 | with Distinction |
| 3 | 75% to below 85% | Very Good | А | 8 | 7.50 - 8.49 | |
| 4 | 65% to below 75% | Good | B+ | 7 | 6.50 - 7.49 | |
| 5 | 55% to below 65% | Above Average | В | 6 | 5.50 - 6.49 | First Class |
| 6 | 45% to below 55% | Average | С | 5 | 4.50 - 5.49 | Second Class |
| 7 | 35% to below 45% aggregate (internal and external put together) with a minimum of 30% in external valuation | Pass | Р | 4 | 3.50 - 4.49 | Third Class |
| 8 | Below an aggregate of 35% or below 30% in external evaluation | Fail | F | 0 | 0-3.49 | Fail |
| 9 | Not attending the examination | Absent | Ab | 0 | 0 | Fail |

- When students take audit courses, they will be given Pass (P) or Fail (F) grade without any credits.
- The successful completion of all the courses and capstone components prescribed for the threeyear or four-year programme with 'P' grade shall be the minimum requirement for the award of UG Degree or UG Degree Honours or UG Degree Honours with Research, as the case may be.

6.1. COMPUTATION OF SGPA AND CGPA

• The following method shall be used to compute the Semester Grade Point Average (SGPA): The SGPA equals the product of the number of credits (Ci) with the grade points (Gi) scored by a student in each course in a semester, summed over all the courses taken by a student in the semester, and then divided by the total number of credits of all the courses taken by the student in the semester,

i.e. SGPA (Si) =
$$\Sigma i$$
 (Ci x Gi) / Σi (Ci)

where Ci is the number of credits of the ith course and Gi is the grade point scored by the student in the ith course in the given semester. Credit Point of a course is the value obtained by multiplying the credit (Ci) of the course by the grade point (Gi) of the course.

 $SGPA = \frac{Sum of the credit points of all the courses in a semester}{Total credits in that semester}$

ILLUSTRATION - COMPUTATION OF SGPA

| Semester | Course | Credit | Letter | Grade | Credit Point | |
|----------|----------|--------|----------------|-------|------------------|--|
| | | | Grade | point | (Credit x Grade) | |
| Ι | Course 1 | 3 | А | 8 | 3 x 8 = 24 | |
| Ι | Course 2 | 4 | B+ | 7 | 4 x 7 = 28 | |
| Ι | Course 3 | 3 | В | 6 | 3 x 6 = 18 | |
| Ι | Course 4 | 3 | 0 | 10 | 3 x 10 = 30 | |
| Ι | Course 5 | 3 | C | 5 | 3 x 5 = 15 | |
| Ι | Course 6 | 4 | В | 6 | 4 x 6 = 24 | |
| | Total | 20 | | | 139 | |
| | | SGI | 139/20 = 6.950 | | | |

• The Cumulative Grade Point Average (CGPA) of the student shall be calculated at the end of a programme. The CGPA of a student determines the overall academic level of the student in a programme and is the criterion for ranking the students.

CGPA for the three-year programme in CUFYUGP shall be calculated by the following formula.

 $CGPA = \frac{Sum of the credit points of all the courses in six semesters}{Total credits in six semesters (133)}$

CGPA for the four-year programme in CUFYUGP shall be calculated by the following formula.

$$CGPA = \frac{Sum of the credit points of all the courses in eight semesters}{Total credits in eight semesters (177)}$$

- The SGPA and CGPA shall be rounded off to three decimal points and reported in the transcripts.
- Based on the above letter grades, grade points, SGPA and CGPA, the University shall issue the transcript for each semester and a consolidated transcript indicating the performance in all semesters.

Major Courses

| Programme | BSc IT | | | | | | | |
|----------------|---|----------|----------|-----------|-------|--|--|--|
| Course Code | ITY1CJ101/ITY1MN100 | | | | | | | |
| Course Title | Fundamentals of IT and Computational Thinking | | | | | | | |
| Type of Course | Major | | | | | | | |
| Semester | Ι | | | | | | | |
| Academic | 100 - 199 | | | | | | | |
| Level | | | | | | | | |
| Course Details | Credit | Lecture | Tutorial | Practical | Total | | | |
| | | per week | per week | per week | Hours | | | |
| | 4 | 3 | - | 2 | 75 | | | |
| Pre-requisites | 1. Fundamentals of electronic components | | | | | | | |
| | 2. Basic mathematical operations | | | | | | | |
| Course | This course provides a comprehensive overview of computing, covering | | | | | | | |
| Summary | historical milestones, hardware components, software systems, and | | | | | | | |
| | computational thinking principles. Students will explore the evolution of | | | | | | | |
| | computing systems, from early pioneers to modern processors and | | | | | | | |
| | quantum units. The curriculum delves into hardware intricacies, | | | | | | | |
| | software distinctions, and essential concepts in IT, emphasizing | | | | | | | |
| | problem-solving skills and algorithmic thinking. Practical aspects | | | | | | | |
| | include hands-on experiences with hardware assembling, operating | | | | | | | |
| | system installation, algorithm and flowchart visualization. | | | | | | | |

Course Outcomes (CO):

| CO | CO Statement | Cognitive Level* | Knowledge Category# | Evaluation Tools used |
|-----|---|---------------------|------------------------|---|
| CO1 | Develop a foundational knowledge of computing systems, encompassing their historical development, evolutionary milestones, and the notable contributions of key figures in the field. | U | F | Instructor- created exams / Quiz |
| CO2 | Acquire familiarity with diverse hardware components constituting a computer system. | U | С | Practical Assignment / Observation of Practical Skills |
| CO3 | Gain practical expertise by engaging in hands-on activities focused on the installation and configuration of diverse hardware components within a computer system. | Ар | Р | Practical Assignment / Observation of Practical Skills |
| CO4 | Explore the spectrum of software types, and actively participate in the partitioning, installation, and configuration of operating systems to cultivate a comprehensive understanding of software systems. | Ар | Р | Practical Assignment / Observation of Practical Skills |
| CO5 | Develop a foundational understanding of IT as a discipline, examining problems through the lens of computational thinking and cultivating | An | C | Instructor- created exams / Quiz |
| | analytical skills to address challenges in the field. | | | | | | | | |
|---------------------------|---|----|---|---|--|--|--|--|--|
| CO6 | Represent complex problems using algorithmic approaches and enhance problem-solving skills by visualizing solutions through the utilization of various software tools. | Ар | Р | Practical Assignment / Observation of Practical Skills | | | | | |
| * - Re # - Fa Metao | * - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M) | | | | | | | | |

Detailed Syllabus

| Module | Unit | Content | Hrs | Marks |
|--------|------|---|---------|-------|
| | | | (45+30) | |
| Ι | | History and Evolution of Computing System | 9 | |
| | 1 | Introduction Characteristics of a computer, Stored Programme | 1 | |
| | | Concept,Generations | | |
| | 2 | Overview of Computer System- Von Neumann Model, Number | 2 | |
| | | Systems (Binary, Hexa, Octal, Decimal) | | |
| | 3 | Number Conversion and Digital Codes - Conversion from one | 2 | |
| | | number system to another, Digital Codes (Gray, Excess-3, BCD) | | |
| | 4 | Pioneers and Contributors of Computing Systems - First | 2 | 15 |
| | | Mechanical computer - Charles Babbage, Stored-Program | | |
| | | Architecture - John von Neumann, Turing machine - Alan Turing, | | |
| | | First General-Purpose Electronic Digital Computer - John | | |
| | | Mauchly and J. Presper Eckert, Artificial Intelligence- John | | |
| | | McCarthy (Contributions only). | | |
| | 5 | Computing Systems: Past to Present - Single Core, Dual-Core | 2 | |
| | | and Multi-Core Processors, Graphics Processing Unit (GPU), | | |
| | | Accelerated Processing Unit, Quantum Processing Units (QPU) | | |
| TT | | (Concept only). | 11 | |
| 11 | 6 | Hardware Electronic Components Active Components Diede | 1 | |
| | 0 | Transistor Integrated Circuits (Definition Symbol and Function) | 1 | |
| | 7 | Flactronic Components Passive Components Pasistors | 1 | |
| | / | Capacitors Inductors (Definition Symbol and Function) | 1 | |
| | 8 | Motherboard Components – CPU and Cooling Fan RAM | 2 | |
| | 0 | Expansion Slots (PCIe) Input/Output Ports Chinset (Concent | 2 | 20 |
| | | only). | | |
| | 9 | Motherboard Components – BIOS/UEFI Chip. SATA/NVMe | 3 | |
| | - | Slots. Network Interface. Ports- Ethernet. VGA. HDMI. USB | 0 | |
| | | (Concept only). | | |
| | 10 | Computer Components – SMPS, Motherboard, Storage Devises | 2 | |
| | _ | (HDD, SSD, NVMe (Concept only). | | |
| | 11 | Computer Components – RAM (DRAM, SRAM, DDR | 2 | |
| | | SDRAM), ROM, Cache (Concept only). | | |
| III | | Software | 10 | |
| | 12 | Software - Application Software, System Software, Examples | 1 | |
| | 13 | Operating System – Need of OS, Types – Proprietary and Open | 4 | |

| | | Source, Hardware Software Compatibility, POST, Booting. | | |
|----|----|--|----|----|
| | 14 | OS Installation – Bootable Media, UEFI/Legacy BIOS, Disk | 4 | 15 |
| | | Partitioning, Dual Booting, Boot Manager - BOOTMGR, Grub, | | |
| | | File Systems- FAT, NTFS, ext4. | | |
| | 15 | Device Drivers – Need of Device Drivers, Driver Interactions | 1 | |
| | | (Basic concept only). | | |
| IV | | Information Technology and Computational Thinking | 15 | |
| | 16 | Information Technology - Role of IT in the Modern Era. | 1 | |
| | 17 | Problem Solving - Defining the Problem, Systematic Approach. | 2 | 20 |
| | 18 | Computational Thinking – Problem Decomposition, Pattern | 2 | |
| | | Identification, Abstraction, Generalization. | | |
| | 19 | Logical Thinking – Inductive and Deductive Reasoning, Logical | 2 | |
| | | Expressions. | | |
| | 20 | Algorithmic Thinking – Intuition vs Precision, Defining | 2 | |
| | | algorithms. | | |
| | 21 | Algorithm – Need of Algorithm, Qualities of a Good Algorithm, | 3 | |
| | | Examples. | | |
| | 22 | Flowchart - Flowchart Symbols, Examples. Raptor. | 3 | |
| V | | Lab Activities | 30 | |
| | | | 30 | |
| | | 1. Identify, categorize and list out specifications of given | | |
| | | electronic components. | | |
| | | 2. Identify and list out specifications of given motherboard | | |
| | | components. | | |
| | | 3. Identify and Describe various ports and connectors on | | |
| | | motherboard. | | |
| | | 4. Installation of various components on motherboard (D_{1}, D_{2}, D_{3}) | | |
| | | (Processor, Fan, Heat Sink, KAM etc.) | | |
| | | 5. Hands-on experience in assembling and disassembling a | | |
| | | Computer system (SIMPS, Motherboard, Storage Device etc.). | | |
| | | (DIOS) on Unified Extensible Example Interface (UEEI) | | |
| | | (BIOS) of Unified Extensible Firmware Interface (UEFI) | | |
| | | 7 Dreparation of Bootable modie with software like Bufus | | |
| | | 8. Check the hardware compatibility and Install operating system | | |
| | | (single booting) on given computer | | |
| | | 9 Check the hardware compatibility and Install operating | | |
| | | systems (dual booting – Windows and Linux) on given computer | | |
| | | systems (dual booting windows and Endex) on given computer. | | |
| | | Develop algorithms and implement the solutions using | | |
| | | <i>RAPTOR</i> flowchart execution tool for the following problems | | |
| | | | | |
| | | 10. Read and print a number. | | |
| | 1 | 11. Read the price of three items and print the total bill amount. | | |
| | | 12. Read ages of two persons and print the elder one. | | |
| | 1 | 13. Read the number of units of electricity consumed and print the | | |
| | | bill amount for various slabs. | | |
| | 1 | 14. Read a vear and check whether it is a leap vear. | | |
| | | 15. Print first N numbers (using loop). | | |

Mapping of COs with PSOs and POs:

| | 18 | Storage classes – The scope, visibility and lifetime of | 2 | |
| | | variables. Auto, Extern, Static and Register storage classes | | |
| | 19 | Structure and Union - Defining, giving values to members, | 2 | |
| | | initialization of structure variables, arrays of structure, unions | - | |
| | 20 | Pointers definition, declaring and initializing pointers, | 3 | |
| | | accessing a variable ,Pointers and arrays, pointers and | | |
| | | functions, pointers and structure | | |
| | 21 | Pre-processor directives | 2 | |
| | 22 | File handling: modes of files, file operations | 2 | |
| V | | Hands-on Problem-Solving Using C | 30 | |
| | 1 | Practical Applications, Case Study and Course Project | 20 | |
| | 1 | Implement the following: | 30 | |
| | | 1. variables, Data types, Constants and Operators: | | |
| | | 1. Evaluation of expression ex: $((x+y)/2 * (x+z))/w$ | | |
| | | 2. I emperature conversion problem (Fanrenneit to Celsius) | | |
| | | 12 months and 4 days | | |
| 1 | 1 | 12 monuts and 4 uays) | | |

| 4. Salesman salary (Given: Basic Salary, Bonus for every item | |
|---|--|
| sold, commission on the total monthly sales) | |
| 2. Decision making (Branch / Loop) Statements: | |
| 5. Solution of quadratic equation | |
| 6.Maximum of three numbers | |
| 7.Calculate Square root of five numbers (using goto statement) | |
| 8.Pay-Bill Calculation for different levels of employee (Switch | |
| statement) | |
| 9. Fibonacci series | |
| 10.Armstrong numbers | |
| 11.Pascal 's Triangle | |
| 3. Arrays, Functions and Strings: | |
| 12.Prime numbers in an array | |
| 13.Sorting data (Ascending and Descending) | |
| 14.Matrix Addition and Subtraction | |
| 15.Matrix Multiplication | |
| 16.Transpose of a matrix | |
| 17Function with no arguments and no return value | |
| 18. Functions with argument and return value | |
| 19. Functions with argument and multiple return values | |
| 20.Function that convert lower case letters to upper case | |
| 21. Factorial using recursion. | |
| 22. Perform String Operations using Switch Case | |
| 23. Largest among a set of numbers using command line | |
| argument | |
| 4. Structures and Union: | |
| 24. Structure that describes a hotel (name, address, grade, avg | |
| room rent, number of rooms) Perform some operations (list of | |
| hotels of a given grade etc.) | |
| 5. Pointers: | |
| 25.Evaluation of Pointer expressions | |
| 26.Function to exchange two pointer values | |
| 27. Reverse a string using pointers | |
| 28.Insertion, deletion, and searching in an array | |
| 6.Files | |
| 29. Programs using files | |

| Module | Unit | it Content | | | | | | |
|--------|------|--|----|----|--|--|--|--|
| Ι | | Introduction to Data Structures and Basic Algorithms | 9 | 15 | | | | |
| | 1 | 1 | | | | | | |
| - | 2 | 2 Introduction to Arrays: Definition, Types (1 Dimensional, 2 Dimensional, Multi-Dimensional, Sparse matrix), Different Array Operations with Algorithm (insertion deletion traversal) | | | | | | |
| - | 3 | Structures and Self-referential structures | 1 | | | | | |
| - | 4 | Introduction to Linked list: Definition, Types (Single linked list, Doublelinked list, Circular linked list- concept only). | 2 | | | | | |
| - | 5 | Singly Linked List Operations with Algorithm (insertion, deletion, traversal) | 2 | | | | | |
| II | | Stack and Queue | 10 | 20 | | | | |
| | 6 | Introduction to Stack: Definition, stack operations with Algorithm, Applications: recursion, infix to postfix - example and Algorithm | 3 | | | | | |
| - | 7 | Implementation of Stack: using array (overflow & underflow) and Linkedlist (with algorithm) | 2 | | | | | |
| | 8 | 2 | | | | | | |
| | 9 | Implementation of Queue: using array and Linked list (with algorithm) | 3 | | | | | |
| III | | Non- Linear Data Structures | 16 | 20 | | | | |
| - | 10 | Introduction to Trees: Basic terminology, Types (Binary tree- complete full skewed etc., Expression Tree) | 2 | | | | | |
| - | 11 | Properties of Binary tree, Applications. | 2 | | | | | |
| - | 12 | Binary tree representations- using array and linked list | 2 | - | | | | |
| - | 13 | Operations on Binary tree- Insertion, Deletion, Traversal- inorder, preorder, postorder - (concepts with examples) | 3 | | | | | |
| | 14 | Algorithm of non-recursive Binary tree traversal | 3 | | | | | |
| - | 15 | Introduction to Graph: Definition, Basic terminology, Types (Directed, Undirected, Weighted) | 2 | | | | | |
| - | 16 | Graph representation –Adjacency list and Adjacency Matrix, Applications. | 2 | | | | | |
| IV | | Sorting and Searching | 10 | 15 | | | | |
| | 17 | Introduction to Sorting: Definition, Classification (Internal, External) | 1 | | | | | |
| | 18 | Internal Sorting Algorithms: Selection sort- Selection sort algorithm, Exchange sort- Bubble sort algorithm | 2 | | | | | |
| | 19 | External Sorting Algorithms: Merge sort- Demonstrate with example (NoAlgorithm needed) | 1 | | | | | |
| | 20 | Advanced sorting Algorithm-: Quick sort- Demonstrate with example. (NoAlgorithm needed) | 1 | 1 | | | | |
| | 21 | Introduction to Searching: Linear search and Binary search (Algorithm needed) with example. | 2 | | | | | |

| | 22 | Hashing: Hash Tables, Hash Functions, Different Hash Functions – Division method, Multiplication method, Mid square method, Folding Method | 2 | |
|---|-----|--|----|--|
| V | Har | nds-on Programming in Data Structures: Practical | 30 | |
| | | Applications, Case Study and Course Project | | |
| | 1 | Implement the following using C Language | 25 | |
| | | 1. Basic Operations in a single linked list (Menu driven) | | |
| | | 2. Sort the elements in given singly linked list | | |
| | | 3. Stack using array. | | |
| | | 4. Stack using Linked list | | |
| | | 5. Queue using Array | | |
| | | 6. Queue using Linked list | | |
| | | 7. Sorting algorithms- Selection, Bubble Sort | | |
| | | 8. Searching Algorithms- Linear and Binary search | | |
| | 2 | Project/ Case study | 5 | |

|--------|------|

Hrs Mark

a,

| | | | (45+30) | |
|-----|----|---|---------|----|
| Ι | | Database System- Concept | 10 | 15 |
| | 1 | Introduction, Characteristics of the Database Approach | 2 | |
| | 2 | Actors on the Scene, Workers behind the Scene, Advantages of | 2 | |
| | | Using the DBMS Approach, File system vs Database | | |
| | 3 | Data Models, Schemas, and Instances, Three-Schema | 3 | |
| | | Architecture and Data Independence | | |
| | 4 | Database Languages and Interfaces | 2 | |
| | 5 | Structured, Semi Structured and Unstructured Database | 1 | |
| II | | Database Design | 14 | 20 |
| | 6 | ER Model- Basic concepts, entity set & attributes, notations | 2 | |
| | 7 | Relationships and constraints, cardinality, participation, | 2 | |
| | | notations, weak entities | | |
| | 8 | Relational Model Concepts-Domains, Attributes, Tuples, and | 2 | |
| | | Relations, Values and NULLs in the Tuple | | |
| | 9 | Relational Model Constraints and Relational Database Schemas | 2 | |
| | 10 | Relational Database Design- Atomic Domain and Normalization | 2 | |
| | 11 | INF, 2NF,3NF, BCNF | 4 | |
| III | | Query Languages | 11 | 20 |
| | 12 | | 1 | |
| | | SQL-, introduction to Structured Query Language (SQL) | | |
| | 13 | Data Definition Language (DDL), Table definitions and | 2 | |
| | | operations | | |
| | 14 | SQL DML (Data Manipulation Language) - SQL queries on | 4 | |
| | | single and multiple tables | | |
| | 15 | Nested queries (correlated and non-correlated), Aggregation | | |
| | | and grouping. Views, assertions, Triggers, SOL data types. | | |
| | 16 | Introduction to NoSOL Databasas | 2 | |
| | 10 | Main characteristics of Key-value DB (examples from: Redis) | 2 | |
| | 17 | Document DB (examples from: MongoDB) | 2 | |
| IV | | Transaction Processing Concurrency Control | 10 | 15 |
| 1 1 | 18 | Transaction Processing: Introduction Transaction and System | 3 | 10 |
| | 10 | Concents | 5 | |
| | 19 | Desirable Properties of Transactions | 1 | |
| | 20 | Characterizing Schedules Based on Recoverability & | 2 | |
| | | Serializability | _ | |
| | 21 | Transaction Support in SOL. | 1 | |
| | 22 | Introduction to Concurrency Control: Two-Phase Locking | 3 | |
| | | Techniques | | |
| V | | DBMS LAB | 30 | |
| | 1 | Students should decide on a case study and formulate the | 3 | |
| | | problem statement. | | |
| | 2 | Based on Identified problem Statement, Design ER Diagram | 3 | |
| | | (Identifying entities, attributes, keys and relationships between | | |
| | | entities, cardinalities, generalization, specialization etc.) | | |
| | | Note: Student is required to submit a document by drawing ER | | |
| | | Diagram to the Lab teacher. | | |
| | 3 | Converting ER Model to Relational Model (Represent entities | 2 | |
| | | and relationships in Tabular form, Represent attributes as | | |

| | columns, identifying keys) Note: Student is required to submit a document showing the database tables created from ER Model. | | |
|----|---|---|--|
| 4 | Normalization -To remove the redundancies and anomalies in the above relational tables, Normalize up to Third Normal Form | 3 | |
| 5 | Creation of Tables using SQL- Overview of using SQL tool, Data types in SQL, Creating Tables (along with Primary and Foreign keys), Altering Tables and Dropping Tables | 3 | |
| 6 | Practicing DML commands-Insert, Select, Update, Delete | 2 | |
| 7 | Experiment 7: Practicing Queries using ANY, ALL, IN, EXISTS, NOT EXISTS, UNION, INTERSECT, CONSTRAINTS etc. | 2 | |
| 8 | Practicing Sub queries (Nested, Correlated) and Joins (Inner, Outer and Equi). | 2 | |
| 9 | Practice Queries using COUNT, SUM, AVG, MAX, MIN, GROUP BY, HAVING, VIEWS Creation and Dropping. | 4 | |
| 10 | Install and Configure MongoDB to execute NoSQL Commands. | 6 | |

Detailed Syllabus

| Module | Unit | Content | Hrs (45+30) | Marks |
|--------|---------------|---|----------------|-------|
| Ι | | Introduction to Python and Control Flow Statements | 10 | 15 |
| | 1 | Tokens in Python | 2 | |
| | 2 | Operators Precedence & Associativity & Type Conversion | 1 | |
| | 3 | Built-in functions | 1 | |
| | 4 | Decision-making Structures | 3 | |
| | 5 | Looping Structures | 3 | |
| Ι | | Introduction to Functions & Modules | 12 | 20 |
| Ι | 6 | Introduction to functions | 2 | |
| | 7 | Scope and lifetime of variables | 1 | |
| | 8 | Types of arguments | 3 | |
| | 9 | Types of functions – recursive, anonymous, returning more | 3 | |
| | 10 | than onevalue | 1 | |
| | 10 | Introduction to Modules | 1 | |
| | 11 | User-defined modules and packages | 2 | 20 |
| 111 | 10 | | 12 | 20 |
| | 12 | Introduction to Strings and traversal | 2 | |
| | 13 | Slicing, splitting, and joining methods on Strings | 1 | |
| | 14 | Introduction to Lists and traversal | 1 | |
| | 15 | List methods | 2 | |
| | 16 | Introduction to Dictionaries and traversal | 1 | |
| | 17 | Dictionaries methods | 2 | |
| IV | | Introduction to Scientific Computing in Python | 11 | 15 |
| | 18 | Basics of NumPy Arrays | 2 | |
| | 19 | Computation on NumPy Arrays | 2 | |
| | 20 | Basics of Pandas objects | 3 | |
| | 21 | Basics of Matplotlib | 1 | |
| | 22 | Plotting in Matplotlib | 3 | |
| V | Hand Study | ls-on Data Structures: Practical Applications, Case and Course Project | 30 | |
| | 1 | Introduction to Python | 20 | |
| | _ | Running instructions in Interactive interpreter and a | | |
| | | PythonScript. | | |
| | | • Generate output with print statements | | |
| | | • Read input, including casting that input to the appropriate | | |
| | | type | | |
| | | Perform calculations involving integers and | | |
| | | floating point numbers using Python operators like | | |
| | | +, -, *, /, //, %, and ** | | |
| | | Call functions residing in the math module | | |

| Γ | 2 | If Statement | | |
|---|---|--|---|-----|
| | | • Make a decision with an if statement | | |
| | | • Select one of two alternatives with an if-else statement | | |
| | | • Select from one of several alternatives by using an if- | | |
| | | elif or if-elif-else statement | | |
| | | Construct a complex condition for an if statement that | | |
| | | includes the Boolean operators and, or and not | | |
| Γ | 3 | Loops | | |
| | | Iterate over a sequence using a for loop | | _ [|
| | | • Use the range () function in a form loop | | |
| | | • Create a while loop to repeat a block of code | | |
| | | • Use the break and continue statement | | |
| | | Nested loops For loop with else clause | | |
| | | While loop with else clause | | 4 |
| | 4 | Function | | |
| | | • Define a function for later use | | |
| | | Pass one or more values into a function | | |
| | | Perform a complex calculation within a function | | |
| | | • Return one or more results from a function | | |
| | | Call a function that you have defined previously | | 4 |
| | 5 | Strings | | |
| | | Create a string String Indexing | | |
| | | Sumg maexing Looping through a String | | |
| | | Looping through a string String Slicing | | |
| | 6 | - Sumg Shemg | | - |
| | 0 | Create a list | | |
| | | • List Indexing | | |
| | | Looping through a list | | |
| | | Adding items to a list | | |
| | | Modifying items of a list | | |
| | | Removing elements | | |
| | | List Slicing | | |
| | | | | |
| | 7 | Tuples | 1 | 1 |
| | | Create a tuple | | |
| | | Tuple Indexing | | |
| | | Looping through a tuple | | |
| | | Adding items to a tuple | | |
| | | Tuple Slicing | | |
| | 8 | Dictionary | | |
| | | Create a dictionary and access values with key | | |
| | | Adding a key-value pair | | |
| | | Adding to an empty dictionary | | |
| | | Modifying values in a dictionary | | |
| | | Removing key-value pair | | |
| | | Looping through a dictionary- Looping through all | | |
| | | key-valuepairs, Looping through all the keys, Looping | | |
| | | through all the values | | |

| | N D | | | | | | |
|----|---|---|--|--|--|--|--|
| 9 | NumPy | | | | | | |
| | • Create NumPy(1 D, 2D, and 3D) arrays from a sequence | | | | | | |
| | Create NumPy Arrays using functions | | | | | | |
| | Arithmetic Computations using Universal Functions | | | | | | |
| | Broadcasting | | | | | | |
| | Fancy Logic | | | | | | |
| 10 | Pandas | | | | | | |
| | Create a data frame from a dictionary | | | | | | |
| | • Create an explicitly indexed series object from an array or list | | | | | | |
| | Create Index objects of various types | | | | | | |
| | Perform set operations on Index objects | | | | | | |
| 11 | Matplotlib | | | | | | |
| | • Create and format a simple line plot | | | | | | |
| | • Create and format a simple scatter plot | | | | | | |
| | • Create and format a simple histogram | | | | | | |
| | • Create and format a contour plot | | | | | | |
| 12 | Case study | 3 | | | | | |
| 13 | Capstone (/Course) Project: Build a practical application using any | 7 | | | | | |
| | onepackage and implement the visualization tools | | | | | | |

| | Develop Shen Scripts using Linux | C | 1 | Δ ssignment / |
| | | | | Observation |
| | | | | of Practical |
| | | | | Skills |

* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)

Detailed Syllabus:

| Module | Un | Content | Hrs | Marks |
|--------|----|--|---------|-------|
| | it | | (45+30) | (70) |
| Ι | In | troduction to Operating Systems & Process Management | 10 | 15 |
| | 1 | Operating System: History, Types, Objectives and | 2 | |
| | | Functions | | |
| | 2 | 2 | | |
| | 3 | Types of Process Schedulers and Operations on Process | 2 | |
| | 4 | Co operating Processes | 2 | |
| | 5 | Inter Process Communication | 2 | |
| П | (| CPU Scheduling, Process Synchronisation and Deadlocks | 15 | 20 |
| | 6 | Basic Scheduling Concepts, Scheduling Criteria | 1 | |
| | 7 | CPU Scheduling Algorithms | 2 | |
| | 8 | Process Synchronisation: Critical Section | 2 | |
| | 9 | Semaphores | 2 | |
| | 10 | Classical Problems of Synchronisation: Reader Writer, Dining Philosopher | 2 | |
| | 11 | Introduction to Deadlock: Necessary Conditions, Resource Allocation Graph | 2 | |
| | 12 | Handling Deadlocks: Prevention, Avoidance, Detection & Recovery | 4 | |
| III | | Memory Management Techniques | 10 | 20 |
| | 13 | Basic Concepts: Physical VS Logical Address, Continuous | 2 | |
| | | Memory Allocation | | |
| | 14 | Fragmentation Problem and Solutions | 2 | |
| | 15 | Non contiguous Memory Allocation: Paging | 2 | |
| | 16 | Non contiguous Memory Allocation: Segmentation, | 2 | |
| | 17 | Virtual Memory Concepts (Concept only) | 2 | |
| IV | | Linux Shell Programming | 10 | 15 |
| - ' | 18 | Introduction: Types of Linux Shells, File | 2 | |
| | _ | Directory & File Management Commands: ls. | | |
| | | cd.pwd.mkdir.rm.cp.mv. chmod.touch | | |
| | | Input/Output Commands: read, echo, | | |
| | | Text Processing Commands: grep, cat | | |
| | 19 | Piping and Redirection operators: ,>,<,>>,<< | 2 | |
| | | Arithmetic, Logical and Relational Operator | | |
| | 20 | Iterative and Conditional Commands : if, while, for, break, | 2 | |
| | | continue, case | | |
| | 21 | Arrays and functions | 2 | |
| | 22 | Command line arguments, Network commands: ipconfig, | 2 | |
| | | ping, date and time commands, Informative commands: | | |
| | | random, w, ps, free, uptime | | |

| V | Practical Applications using Linux Shell Programming | 30 | |
|---|--|----|---|
| | Implement the following: | 30 | |
| | 1. Write a Shell Script to find the roots of a quadratic | | |
| | equation. | | |
| | 2. Write a shell script for a menu driven program to | | |
| | perform file management (File creation, display | | |
| | content, remove, write content to a file). | | |
| | 3. Write a shell script to count no of line, words and | | |
| | characters of an input file. | | |
| | 4. Write a shell script to find the average of the number | | |
| | entered as command line arguments. | | |
| | 5. Write a shell script to copy the contents of file to | | |
| | another. Input file names through command line. The | | |
| | copy should not be allowed if second file exists. | | |
| | 6. Write a shell script to check network connectivity. | | |
| | 7. Write a shell script that analyzes a log file, extracting | | |
| | and summarizing relevant information such as error | | |
| | counts ,warning messages, into and debug messages | | |
| | using grep command. | | |
| | 8. Write a shell script to display current date and time, list | | |
| | an user account names, count of logged in user | | |
| | time | | |
| | 9 Write a simple game script using random function to | | |
| | implement number quessing game | | |
| | 10 Write a shell script to display your system details | | |
| | (number of users, current processes, memory usage | | |
| | system running time). | | |
| | ~,~v~v~v~v~v~v~v~v~v~v~v~v~v~v~v~v~v~v~ | | 1 |

Course Outcomes (CO)

| CO | CO Statement | Cognitive | Knowledge | Evaluation |
|-----|---|-----------|-----------|---|
| | | Level* | Category# | Tools used |
| CO1 | Develop a solid foundation in numerical methods, acquiring the skills to analyze and solve algebraic and transcendental equations, and gaining a practical understanding of the sources and management of errors in numerical computations. | Ар | Р | Practical Assignment / Instructor- created exams / Quiz |
| CO2 | Cultivate both a comprehensive grasp and practical proficiency in polynomial interpolation techniques, alongside acquiring expertise in numerical methods for the solution of definite integrals. | Ар | Р | Practical Assignment / Instructor- created exams / Quiz |
| CO3 | Establish a robust groundwork in Operations Research, nurturing a discerning capability to critically evaluate its applications across diverse problem-solving scenarios. | Ар | Р | Practical Assignment / Instructor- created exams / Quiz |
| CO4 | Develop expertise in Linear Programming, mastering the art of employing sophisticated optimization techniques for the effective resolution of Linear Programming problems. | Ap | P | Practical Assignment / Instructor- created exams / Quiz |
| CO5 | Impart a comprehensive understanding | Ар | Р | Practical |

| | of transportation problems and cultivate an appreciation for the methods used in finding basic feasible solutions. | | | Assignment / Instructor- created exams / Quiz | | | |
|---|--|----|---|---|--|--|--|
| CO6 | Develop proficiency in addressing assignment problems and employ the method to attain optimal solutions, providing a holistic skill set for logistical optimization. | Ар | Р | Practical Assignment / Instructor- created exams / Quiz | | | |

Detailed Syllabus

| Module | Unit | Hrs | Marks | |
|--------|------|--|---------|----|
| Ι | | Numerical Analysis I | (48+12) | 15 |
| | 1 | Errors in numerical calculations - Sources of errors | 1 | |
| | 2 | 3 | | |
| | | method | | |
| | 3 | Method of false position | 3 | |
| | 4 | Newton Raphson method | 3 | |
| II | | Numerical Analysis II | 12 | 15 |
| | 5 | Polynomial Interpolation - Lagrange interpolation | 3 | |
| | 6 | Newton's forward and backward difference interpolation | 3 | |
| | 7 | Numerical Solution of Definite Integral - Simpson's 1/3rd rule | 2 | |
| | 8 | Simpson's 3/8 Rule | 2 | |
| | 9 | Trapezoidal method | 2 | |
| III | | Operations Research I | 13 | 20 |
| | 10 | Introduction to Operations Research – Definition, Advantages and | 1 | |
| | | Limitations of Operations Research | | |
| | 11 | Linear Programming Problem – Definition, Formulation of LPP, | 2 | |
| | | Feasible solution and Optimal solution | | |
| | 12 | Dual of LPP | 2 | |
| | 13 | Graphical solution of LPP | 2 | |
| | 14 | Simplex Method | 3 | |
| | 15 | Big-M method | 3 | |
| IV | | Operations Research II | 13 | 20 |
| | 16 | Transportation Problem – Definition, Balanced and unbalanced | 1 | |
| | | Transportation problems | | |
| | 17 | Finding basic feasible solutions – Northwest corner method | 2 | |
| | 18 | Least cost method | 1 | |
| | 19 | Vogel's approximation method | 2 | |
| | 20 | Optimized (MODI) method | 3 | |
| | 21 | Assignment model - Definition, Balanced and unbalanced | 1 | |
| | | Assignment problems | | |
| | 22 | Hungarian method for optimal solution | 3 | |
| V | | Open Ended Module – Other Numerical Methods | 12 | |

| 1 | • Any other two methods to solve Algebraic and Transcendental | 12 | |
|---|--|----|--|
| | Equations | | |
| | • Any other two methods for Polynomial Interpolation | | |
| | • Any other two methods to solve Solution of Definite Integral | | |
| | • Any other method to solve LPP | | |

Detailed Syllabus

| Module | Unit | Content | Hrs (45+30) | Marks |
|--------|--------|---|---|-------|
| T | | Review of OOPs and Introduction to Java | (4 3 + 30) 17 | 20 |
| - | 1 | Overview of OOPs Concept | 1 | 20 |
| | 2 | History of Java and Java Virtual Machine | 1 | |
| | 3 | Basic Structure of Java Programming: Data Types. | 2 | |
| | | Operators, Expression and Control Statement | | |
| | 5 | Arrays and String: One Dimensional Array, Multidimensional Array, String Operations | 2 | |
| | 6 | Scanner, Type Conversion and Casting | 2 | |
| | 7 | Introduction to Class and Objects: Definition of Class and Objects, Access Modifier | 2 | |
| | 8 | Constructor and Inheritance: Types of Constructors, Types of Inheritance, use of extends, super, final, this keyword | 3 | |
| | 9 | Method Overriding, Method Overloading and Dynamic Method Dispatch: Programming implementation of Method Overriding and Overloading | 2 | |
| | 10 | Interface, Abstract Class and Packages; Programming implementation of Interface, Abstract class and Packages | 2 | |
| II | Except | tion and I/O Operations | 8 | 15 |
| | 11 | Exception: Baic Concept of exception and Exception Hierarchy | 2 | |
| | 12 | Managing Exception: Use of trycatch finally blocks, throw and throws keyword | 2 | |
| | 13 | Managing Input/Output files in Java: Importance of I/O Operations, BufferedInputStream,BufferedOutputStream | 2 | |
| | 14 | File Operations: Programming implementation of FileInputStream, FileOutputStream, FileReader, FileWriter | 2 | |
| III | Multit | hreading and Database Connectivity | 9 | 20 |
| | 15 | Thread: Concept of Thread and Thread state | 2 | |
| | 16 | Programming Implementation of Thread: Using extending thread class and Runnable interface, Thread Priorities | 2 | |

| | 17 | Database Programming: Basic Concept of Database and JDBC Driver, Connecting with Database | 2 | |
|-----|--------|--|----|----|
| | 18 | Querying Database: Programming implementation of | 3 | |
| | | creating table, insert and update values to the table | | |
| | | using preparedStatement, Statement object and | | |
| | | querying the values using ResultSet and DesultSetMetadate | | |
| IV | | rogromming | 11 | 15 |
| 11 | 10 | Introduction to GUI Application: AWT Basics | 2 | 15 |
| | 19 | Introduction to IDE | 2 | |
| | 20 | Swing Programming: Introduction of Model-View- Controller Pattern | 2 | |
| | 21 | Introduction to layout Management: Fundamental controls used in SWING | 4 | |
| | 22 | Event Handling: Basic Knowledge of Event Handling (Event Class and Event Listener) | 3 | |
| V | Hands | | 30 | 30 |
| , , | Eclips | e, VSCode): | | |
| | Practi | cal Applications, Case Study and Course Project | | |
| | 1 | Implement the following: | | |
| | | 1. String and Arrays: | 20 | |
| | | Write a program to perform various String operations | | |
| | | in Java (Hint: charAt, substring, concat, equals,, | | |
| | | isEmpty) | | |
| | | Write a program to implement Multi-Dimensional Array (Hint : Matrix multiplication) | | |
| | | 2. Object Oriented Programming Concept: | | |
| | | Write a program to implement the concept of class and object (Hint: Complex Number addition) | | |
| | | Write a program to demonstrate the order in which | | |
| | | constructors are invoked in multilevel inheritance. | | |
| | | Write a program to implement method overloading | | |
| | | Write a program to implement method overriding. | | |
| | | 3. Exception Handling and Multithreading: | | |
| | | Write a program to implement trycacth, finally block (Hint: Arithmetic and ArrayOutOfBound | | |
| | | Exception) | | |
| | | Write a multi thread java program for displaying odd numbers and even numbers up to a limit (Hint: Create | | |
| | | thread by inheriting Thread class). | | |
| | | Write a multi thread java program for displaying odd | | |
| | | numbers and even numbers up to a limit (Hint: | | |
| | | Implement thread using Kunnable interface). | | |
| | | 4. GOT Application with Database: Write a swing program to track mouse & key events | | |
| | | Write a swing program to fetch data from TextFiled | | |

3

| Write a swing program to perform form validation | |
|--|--|
| Write a swing program to display data in tabular form | |
| Write a simple login program without database connectivity | |
| Write a swing program to create a registration form | |
| (Hint: Create table student in any database and link | |
| the registration form with database using JDBC) | |
| 2Case Study2 | |
| 3 Project: Build a application for shop management 8 system (Eg: Admin Login, Product registration, stock management, product selling, employee salary) | |

Detailed Syllabus

| Module | Unit | Content | Hrs (60) | Marks |
|--------|------|--|-------------|-------|
| Ι | | Notion of Different types of Securities | 12 | 15 |
| | 1 | Information security - computer security - security goals, relation between security, confidentiality, integrity, availability and authorization, vulnerabilities - principles of adequate protection. | 3 | |
| | 2 | Notions of operating security, database security, program security, network security attacks - threats, vulnerabilities and controls. | 3 | |
| | 3 | 2 | | |
| | 4 | Computer criminals - amateurs, crackers, career criminals. | 2 | |
| | 5 | Methods of defence control, hardware controls, software controls, effectiveness of controls. | 2 | |
| II | | Program security | 12 | 15 |
| | 6 | Secure programs - fixing faults, unexpected behaviour, types of flaws. | 2 | |
| | 7 | Non-malicious program errors - buffer overflows, incomplete mediation. | 1 | |
| | 8 | Viruses and other malicious code - kinds of malicious code, how viruses attach, how viruses gain control, prevention, | 3 | |
| | 9 | Control example - the brain virus, the internet worm, web bugs. | 3 | |
| | 10 | Targeted malicious code - trapdoors, Salami attack | 1 | |
| | 11 | Controls against program threats - development controls, peer reviews, hazard analysis | 2 | |
| III | | Operating system security | 12 | 20 |
| | 12 | Protected objects and methods of protection - memory address protection - fence, relocation, base/bounds registers, tagged architecture, segmentation, paging. | 2 | |
| | 13 | Control of access to general objects - directory, access control list | 2 | |
| | 14 | File protection mechanism - basics forms of protection, single permissions. | 2 | - |
| | 15 | Authentication - authentication basics, password, authentication process challenge - response, biometrics | 2 | |
| | 16 | Trusted operating systems - security policies for operating systems | 2 | |
| | 17 | Models of security - requirement of security systems, multilevel security, access security, limitations of security systems | 2 | |
| IV | | Database Security | 12 | 20 |
| | 18 | Security requirements - integrity, confidentiality and availability of database | 2 | |
| | 19 | Reliability and integrity of database | 2 | |
| | 20 | Sensitive data, interface | 3 | |
| | 21 | Multilevel database | 2 | |
| | 22 | Proposals for multilevel database security | 3 | |
| V | | Open Ended Module | 12 | |

| CASE STUDY: Administrating security | |
|---|--|
| Security planning – | |
| Contents of a security planning, team members, commitment to a security plan, | |
| business continuity plans. | |
| Risk analysis – | |
| the nature of risk, steps of risk analysis. | |

Detailed Syllabus

| Module | Unit | Content | Hrs (45+30) | Marks |
|-------------|-----------------|--|----------------|-------|
| Ι | Intr | oduction to Data Structures and Analysis of Quality of an Algorithm | 9 | 12 |
| | 1 | Data structure - definition - types & operations, characteristics of data structures | 2 | |
| | 2 | Abstract Data Type (ADT) – algorithms - concepts - definition - objectives of algorithms - | 1 | |
| | 3 | Quality of an algorithm - space complexity and time complexity of an algorithm. | 2 | |
| | 4 | Growth of Functions: Asymptotic notations, Cost estimation based on key operations- Big Oh, Big Omega, Little Oh, Little Omega and Theta notations | 3 | |
| | 5 | Algorithm Design: Introduction, Steps in developing algorithm, Methods of specifying an algorithm | 1 | |
| II | | Basic Technique for Design of Efficient Algorithm | 11 | 15 |
| | 6 | Brute Force approach (String pattern matching) | 1 | |
| | 7 | Divide-and-Conquer approach (Merge sort) | 1 | _ |
| | 8 | Branch-and-Bound technique (Knapsack problem) | 2 | |
| | 9 | Greedy approach (Kruskal's algorithm and Prim's Algorithm) | 3 | - |
| | 10 | Dynamic Programming (Longest Common Subsequence) | 2 | - |
| | 11 | Backtracking (Sum of subsets problem) | 2 | |
| III | | Linked lists - operations and implementations | 12 | 15 |
| | 12 | Introduction to Singly Linked list and its operations | 2 | - |
| | 13 | Circular Linked list and its operations | 3 | - |
| | 14 | Doubly Linked list and its operations | 2 | - |
| | 15 | Circular Doubly Linked list and its operations | 2 | - |
| | 16 | Recursive lists, heterogeneous lists, deterministic skip lists- | 3 | |
| TT 7 | | Creation & Searching | 10 | 20 |
| IV | 17 | Non-linear Data Structures | 13 | 20 |
| | 1/ | Binary search trees - traversals and operations on BS I | 3 | |
| | 18 | AVL tree, Red Black Tree (concept only) | 2 | - |
| | 19 | Balanced trees - M-way trees - B Tree (Concepts only) | 1 | |
| | 20 | Graphs - representation of graphs | 1 | - |
| | $\frac{21}{22}$ | Heap structures Min Max heaps Deeps leftist heaps | 2 | |
| | | hipomial heaps (concepts only) - Applications | 5 | |
| V | Pract | ical Implementations of Data Structures and its Operations | 30 | 20 |
| v | TTACE | in Iava or C Programming Language | 50 | 20 |
| | 1 | Implementation of linear linked list | 25 | |
| | - | Implementation of thread linked list | | |
| | | • Implementation of doubly linked list | | |
| | | • Implementation of BST operations | | |
| | | • Implementation of Depth First Search using graph | | |
| | | • Implementation of Breadth First Search using graph | | |
| | | • Implementation of max heap and delete a node from it. | | |
| | | Sort a set of data using Heap tree | | - |
| | 2 | Case Study/ Project | 5 | |

| Pre-requisites | 1. Knowledge in core concept of Java Programming | | | | | |
| | 2. Knowledge of database concept and SQL | | | | | |
| | 3. Knowledge in basic web concept like HTML, CSS, JavaScript | | | | | |
| Course | The aim of this course is to provide students with a thorough | | | | | |
| Summary | understanding of building dynamic web applications using Java | | | | | |
| | technologies. This course covers essential concepts, frameworks, and | | | | | |
| | tools necessary for developing robust, scalable, and secure web | | | | | |
| | applications. | | | | | |

| CO | CO Statement | Cognitive | Knowledge | Evaluation | |
|--|--|-----------|-----------|-------------------|--|
| | | Level* | Category# | Tools used | |
| CO1 | To understand the concept of web development principles, including client-server architecture, HTTP protocol, and web application lifecycle. | U | C | | |
| CO2 | Acquire proficiency in Java web technologies as Java Server Page. | Ар | Р | | |
| CO3 | Understand the Model-View- Controller (MVC) architecture pattern and its implementation in Java web applications using frameworks like Spring MVC. | Ар | Р | | |
| CO4 | Gain knowledge of web services concepts, including RESTful web services and SOAP-based web services, and learn to develop and consume web services using Java technologies. | Ар | Р | | |
| CO5 | Gain a deep understanding of the principles behind AJAX, including asynchronous communication. | Ар | Р | | |
| CO6 | Understand how to handle AJAX requests on the server-side using technologies such as JSP and Spring MVC. | Ар | Р | | |
| * - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) | | | | | |
| # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) | | | | | |

Metacognitive Knowledge (M)

Detailed Syllabus

| Module | Unit | Content | Hrs (45+30) | Marks | |
|--------|------------------------|---|----------------|-------|--|
| Ι | Over View of Core Java | | 6 | 9 | |
| | 1 | Core Java Concept: Class, Inheritance, Constructor, Exception and Multithreading | 3 | | |
| | 2 | Overview of JDBC: JDBC Concept, Execution of SQL Statements, Transaction Management | 2 | | |
| | 3 | Introduction to Web Applications, Web Servers Overview of J2EE Technologies. | 1 | | |
| Π | | Introduction to JSP | 12 | 15 | |
| | 3 | Fundamental Concept of JSP: JSP & Servlet as Web Components, Servlets vs. JSP | 2 | | |
| | 4 | Working with JSP: JSP Lifecycle, JSP Page Lifecycle Phases | 2 | | |
| | 5 | General Rules of Syntax: JSP syntactic elements, JSP element syntax, Template content | 3 | | |
| | 6 | JSP elements: Directives, Declarations, Expressions, Scriptlets, Actions | 3 | | |
| | 7 | JSP Standard Actions: jsp:useBean, jsp:getPreoperty, jsp:setProperty, jsp:include, jsp:forward, jsp:plugin,jsp:param, Java Server Pages Standard Tag Library(JSTL). | 2 | | |
| III | | Introduction to Spring MVC | 16 | 23 | |
| | 8 | Getting Started with Spring: Overview of the MVC Architecture, Spring Framework and its relevance in web development, Advantages and benefits of using Spring MVC for building web applications. | 2 | | |
| | 9 | Initializing a Spring project with Spring Tool Suite: Simple Example and Sample example analysis, Spring Project Structure | 2 | | |
| | 10 | Writing a Spring Application: Handling Web request, Defining the view, Testing the Controller, Building and Running application | 2 | | |
| | 11 | Developing Web Application: Establishing the domain, creating the controller class, Designing the view, Form submission. | 2 | | |
| | 12 | Working with View Controller: Declaring validation rule, Performing validation, Caching templates. | 2 | | |
| | 13 | Working with Data: Working with JDBC, Defining the Schema and pre-loading data, Inserting data | 2 | | |
| | 14 | Working with Spring Data JDBC: Adding Spring data JDBC, Defining the repositary interface, Preloading data with CommandLineRunner | 2 | |
|----|------|---|----|----|
| | 15 | Exception Handling: Handling exceptions gracefully in Spring MVC applications, Implementing global exception handlers and custom error pages. | 1 | |
| | 16 | Securing Spring: Introduction to Spring Security, Configuring authentication, authorization, and access control. | 1 | |
| IV | | Integrated Spring and AJAX | 11 | 23 |
| | 17 | Creating REST Service: Building RESTful APIs using Spring MVC controllers. Handling HTTP methods (GET, POST, PUT, DELETE) and request parameters. | 2 | |
| | 18 | Introduction to AJAX\: Ajax Fundamentals, JavaScript Libraries, The Prototype Library, Technique Library, Form Completion | 1 | |
| | 19 | Validation: Realtime Validation, Propagating Client- Side View State, Direct Web Remoting | 2 | |
| | 20 | Handling Ajax Requests in Spring MVC: Mapping Ajax request URLs using @RequestMapping annotations. Parsing request parameters and payloads in Spring MVC controllers. Implementing server-side processing logic for Ajax requests. | 2 | |
| | 21 | Form Submission and Validation with Ajax: Submitting forms via Ajax requests in Spring MVC. Validating form inputs on the server-side using Spring's validation framework. Displaying validation errors and messages to the user without page reloads. | 2 | |
| | 22 | Advanced Ajax Technique: Cross-Origin Resource Sharing, CSRF protection, Content Security Policy, caching, throttling, lazy loading. | 2 | |
| V | Han | ds-on Programming in Java (Using IDE NetBeans, Eclipse, VSCode): | 20 | |
| | Prac | ctical Applications, Case Study and Course Project | | |
| | 1 | Create a Java Web Application using JSP contain 1. User Register Form 2. Login Form | | |
| | | Develop a Java web application for an online bookstore using JSP perform the task 1. Insert the book details (Title Name, Author Name, Price, Quantity). 2. View a list of available books with details such as title, author, price, and quantity in stock. | | |

| | Create Java Web Application using JSP to perform the JSP standard Action. | | |
|---|--|---|--|
| | Create Sample Java Web Application using Spring MVC (Hint: Show a message) | | |
| | Create Java Web Application using Spring MVC perform data validation | | |
| | Create Java Web Application using Spring MVC with JDBC (Hint: Perform user registration and Login) | | |
| | Create Java Web Application using Spring MVC to perform exception handling | | |
| | Create Java Web Application using Spring MVC to perform custom error page | | |
| | Create sample web application with Spring Boot | | |
| | Create a simple web application that allows users to perform real-time search for products using AJAX with JSP. | | |
| | Develop a web application that allows users to dynamically load and display additional content when scrolling down the page using AJAX with Spring MVC. | | |
| 2 | Case Study | 2 | |
| 3 | Project: Build a web application for library management system using Spring MVC (Eg: Admin Login, Inserting Book details, stock management, Book issue, display book catelog) | 8 | |

Detailed Syllabus:

| Module | Unit | Content | Hrs |
|--------|------|---|-----|
| Ι | | Introduction to System Programming & Assemblers | 14 |
| | 1 | Introduction to System Programming- Goals of System Software, System | 3 |
| | | Programs and Systems Programming | |
| | 2 | Language Processors- Overview, Kinds of Language processors, | 4 |
| | | language processing activities, program execution | |
| | 3 | System Tables | 1 |
| | 4 | Assemblers- Elements of Assembly Language Programming | 2 |
| | 5 | Design of two pass assembler | 4 |
| II | | Macros and Macro Processors | 10 |
| | 6 | Introduction to macros and macro processors- macro definition and call, | 4 |
| | | macro expression | |
| | 7 | Nested macro calls | 2 |
| | 8 | Design of macro processor | 4 |
| III | | Linkers and Loaders, Scanning and Parsing | 10 |
| | 9 | Relocation and linking concepts | 2 |
| | 10 | Design of linkers | 2 |
| | 11 | Self locating program | 2 |
| | 12 | Loaders- absolute loader, relocating loader | 4 |
| IV | | Compilers, System calls and libraries | 14 |
| | 13 | Data structures used in compilers | 1 |
| | 14 | Phases of a compiler – Introduction | 1 |
| | 15 | Lexical Analysis (Scanning) | 2 |
| | 16 | Syntax Analysis (Parsing) | 2 |
| | 17 | Semantic Analysis | 1 |
| | 18 | Intermediate code generation | 1 |
| | 19 | Code optimisation- optimisation transformation, local optimisation, | 2 |
| | | global optimisation, Code Generation | |
| | 20 | Passes of Compiler | 1 |
| | 21 | System calls and their implementation | 1 |
| | 22 | Standard C library functions for system calls | 2 |
| V | | Open Ended Module: Case Studies | 12 |
| | 1 | • Case studies of lexical and syntax analyzers: LEX and YAAC. | |
| | | • System programs using system calls | |

Note: The course is divided into five modules, with four having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules.

| CO3 | Use Excel for data analysis, including | Ар | Р | Instructor-created exams / Quiz |

| | sorting, filtering, and the creation of Tables. | | | | | | | |
|---------------------------|---|----|---|---|--|--|--|--|
| CO4 | Demonstrate proficiency in utilizing advanced Excel functions | Ар | Р | Instructor-created exams / Quiz | | | | |
| CO5 | Demonstrate collaboration skills and the ability represent real world data and create reports | Ар | Р | Modelling Assignments/ / Case studies | | | | |
| * - Re # - Fa Metac | * - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M) | | | | | | | |

| Module | Unit | Content | Hrs | Ma rks |
|--------|-------|--|-----|-----------|
| Ι | Intro | duction to Spreadsheets | 12 | 18 |
| | 1 | Overview - Overview of spreadsheet software (Microsoft Excel, Google Sheets) and their application | 2 | |
| | 2 | Excel Interface and Navigation-Ribbon,Row ,Column, Cell Worksheet,Workbook,Cell Address,Data range,Formula, Chart) | 2 | |
| | 3 | Basic navigation techniques within the workbook | 2 | |
| 4 | | Creating and Saving Workbooks - Creating a new workbook and saving it, Different file formats and when to use them | 2 | |
| | 5 | Inserting or deleting rows or columns | 2 | |

| | 6 | Basic Cell Formatting - Formatting text, numbers, and | 2 | |
|-----|--------|---|----|----|
| | | dates, | | |
| II | Data M | Management | 11 | 18 |
| | 7 | Find and select -Find,Replace,Go To,Go To Special | 2 | |
| | 8 | Cell Referencing-Relative, Absolute and Mixed | 1 | |
| | 9 | Sorting data-Quick Sorting, Sorting by Multiple Criteria | 2 | |
| | 10 | Filtering data-Quick Filtering, Filtering by Multiple Criteria, Performing Calculations on Filtered Data | 2 | |
| | 11 | AutoFill and Flash Fill | 1 | |
| | 12 | Remove Duplicates | 1 | |
| | 13 | Get External Data - From web, from text and from other sources | 2 | |
| III | Excel | Functions and formulas | 10 | 18 |
| | 14 | Mathematical and Statistical functions(-SUM, AVERAGE, MAX, MIN, ROUND, ABS, SQRT, MOD.,COUNT, COUNTIF, SUMIF, AVERAGEIF, MEDIAN, STDEV, VAR) | 2 | |
| | 15 | Logical Functions(IF, AND, OR, NOT, XOR, IFERROR, IFNA, SWITCH.) | 2 | |
| | 16 | Text Functions (CONCATENATE, LEFT, RIGHT, MID, LEN, SUBSTITUTE, FIND, SEARCH.) | 2 | |
| | 17 | Date & Time Functions-(TODAY, DATE, DAY, MONTH, YEAR, HOUR, MINUTE, SECOND.) | 2 | |
| | 18 | Using formula :Witing a formula ,Cell reference | 2 | |
| 1V | Data A | Analysis and Manipulation | 12 | 16 |
| | 19 | Introduction to Tables and Data Organization - Creating and formatting tables for effective data management, Sorting and filtering data within tables | 3 | |
| | 20 | Data Analysis Techniques - Advanced functions (VLOOKUP, HLOOKUP, INDEX, MATCH) | 3 | |

| | 21 22 | PivotTables and PivotCharts - Understanding PivotTables for data analysis, Creating PivotCharts for visual representation Data Visualization: Creating and customizing various chart | 3 3 | |
|---|----------|---|--------|--|
| V | Proje | ct and Practical Applications | 30 | |
| | 1 | Practical session on real-world applications (Eg: Use advanced functions relevant to field of study, Tabulation of Lab experiments data for better analysis and visualisation) | 15 | |
| | 2 | Course Project: Creating a comprehensive project using Excel features. | 15 | |
| | | | | |

| | 19 | Set and basic operations on a set | 1 | |
| | 18 | Dictionary, built in methods to create, access, and modify key- value pairs | 2 | |
| | 17 | Basic tuple operations | 1 | |
| | 16 | Tuple- creating and accessing tuples in python | 2 | |
| 111 | 15 | Basic list operations | 1 | |
| ш | 14 | List - creating list, accessing, updating and deleting elements from a list | 2 | |
| | 13 | Working with strings and string manipulation | 3 | |
| | Data Structur | es in Python | 1 2 | 19 |
| | 12 | Control Statements- break, continue, pass | 1 | |
| | 11 | Using indentation in Python to define code blocks | 1 | |
| II | 10 | Loops - for loop, for loop with else, while loop, while loop with else, Nested Loops | 5 | |

| V | 1 | Read input, include casting that input to the appropriate type Select from one of several alternatives by using an if-elif or if-elif-else statement Use the range() function in a form loop Call and use functions residing in the math module | |
|---|---|---|--|
| | | Case study: Design a basic calculator application in Python that can perform addition, subtraction, multiplication, and division. Create a Python program that retrieves weather data from an API (e.g., OpenWeatherMap) and displays it. | |

| 4 | Data Structures in Python String - Create a string , Indexing / Looping / Slicing Lists - Create a list , Indexing /Looping / Slicing , Adding items / Modifying items / Removing | |
|---|--|--|
| | items Tuples - Create a tuple , Indexing / Looping / Slicing / Adding items to a tuple Dictionary - Create a dictionary and access values with key / Adding a key- value pair / Adding to an empty dictionary /Modifying values in a dictionary / Removing key- value pair | |

| 5 | Function Call functions residing in the math module Define a function for later use Pass one or more values into a function Return one or more results from a function Call a function that you have | |
|---|---|--|
| | Call a function that you have defined previously | |

| | | Microsoft Word: | 20 | |
| | | 1. Document Formatting: | | |
| | | • Create a new document, set margins to 1 inch, and | | |
| | | change the page orientation to landscape. | | |
| | | • Apply a consistent font style, size, and color to the entire | | |
| | | document. | | |
| | | 2. Paragraph Formatting: | | |
| | | • Create a bulleted or numbered list with at least three | | |
| | | items. | | |

| • Adjust the indentation and line spacing for a specific |
|--|
| 3 Headers and Footers: |
| Insert a header with the document title and page number |
| on the right. |
| • Add a footer with the date aligned to the center. |
| 4. Tables and Graphics: |
| • Create a table with four columns and three rows. |
| • Insert an image into the document and adjust its position. |
| 5. Styles and Themes: |
| • Apply a heading style to a section of text. |
| • Change the document theme to give it a different look. |
| Microsoft PowerPoint: |
| 6. Slide Creation: |
| • Create a new PowerPoint presentation and add five |
| slides. |
| • Apply different slide layouts to each slide. |
| 7. Text and Object Formatting: |
| • Add a title to the first slide and format it with a unique font and color. |
| • Insert a shape and customize its fill and outline colors. |
| 8. Transitions and Animations: |
| • Apply a slide transition between the first and second slides. |
| • Add an entrance animation to a text box on the third slide. |
| 9. Master Slides: |
| • Customize the master slide with a background color or |
| image. |
| • Add a placeholder for slide numbers in the master slide. |
| 10. Delivery and Export: |
| • Set up presenter view for a slideshow. |
| Export the presentation as a PDF document |
| Case Study: Exploring feature of PowerPoint to enhance presentation 5 skill |
| |

| | 8 | Exploring current design trends | 1 |
| | 9 | Overview of innovative websites | 1 |
| Π | HTM | L – Building the Foundation | 12 |
| | 10 | Understanding the basic structure of web pages(Role of HTML, basic concept of webpage, html document structure , <html>,<head>,<body>).</body></head></html> | 2 |
| | 11 | Exploring tags, attributes, and their significance (font type, text formatting tag, other text related tag, heading, paragraphs, list, link, image, common attributes like class, | 2 |

| | | id, src, alt, href). | |
|-----|--------|---|----|
| | 12 | Creating interactive forms to collect user data(form element tag like <form>,<input/>,<textarea>,<select>,<button>,various form controls like text input, button, drodwonbox).</button></select></textarea></form> | 3 |
| | 13 | Designing and structuring tabular data.(Basic table structure tag, colspan, rowspan) | 2 |
| | 14 | Enhancing the meaning and structure of your content(understanding semantic elements, benefit of semantic HTML). | 3 |
| III | CSS – | Styling Your Web Pages | 12 |
| | 15 | Introduction to CSS(understanding the concept of styling, presentation, basic syntax electors, properties and values, inline, internal and external style, different types of selectors) | 3 |
| | 16 | Introduction to common CSS properties(color,font,text,margin, padding, border, background), CSS box model(margin, border, padding and content), positioning elements (static, relative, absolute, fixed, z-index) | 3 |
| | 17 | Introduction to layouts in web designing, The role of responsive layouts, Flexbox layout model, creating Grid, Media queries and breakpoints | 3 |
| | 18 | Transition properties(duration, timing function, property), CSS Animation, Adding interactive hover effect. Overview of CSS frameworks and their benefits. Introduction to Bootstrap and its features. | 3 |
| IV | JavaSo | cript Essentials | 12 |
| | 19 | Overview of Javascript, declaring the variables and understanding data types. Object in Javascript, basic operations and control flow in Javascript | 3 |
| | 20 | Understanding the Document Object Model (DOM).Using selectors to target HTML elements. Modifying content, attributes, and styles dynamically. Using selector, content, attributes and styles dynamically. | 3 |

| | | Creating and Deleting elements. Navigating through the | |
|---|---------|---|----|
| | | DOM hierarchy | |
| | | Down merareny. | |
| | 21 | Understanding events triggered, common events, writing | |
| | | event handlers. Bubbling and capturing phases of event | 3 |
| | | event handlers, bubbing and capturing phases of event | 5 |
| | | propagation, controlling event now, accessing event object | |
| | 22 | Overview of JavaScript libraries and their benefits. | |
| | | Selecting elements, manipulating the DOM, and handling | |
| | | events with iOuery. Applying visual effects and animations | |
| | | with iQuery Fade slide show/hide and custom | 2 |
| | | animations. Making asymphronous requests with | 3 |
| | | animations. Making asynchronous requests with | |
| | | jQuery.ajax(). | |
| | | Handling JSON data and updating the DOM dynamically. | |
| V | Hands | -on Programming in Java(Using VSCode, Atom, Aptana | 30 |
| | Studio |): | |
| | | | |
| | Practic | cal Applications, Case Study and Course Project | |
| | 4 | | |
| | 1 | Implement the following: | |
| | | 1 Program for implementing html tags | 20 |
| | | 1. Trogram for imprementing hum tago | 20 |
| | | 2. Write program for implementing Style a paragraph | |
| | | $(\langle n \rangle)$ to have a red color, a font size of 16nx, and a | |
| | | hold font weight | |
| | | bold fold weight | |
| | | 3. Write a program to implement CSS Box Model | |
| | | | |
| | | 4. Create a simple layout using Flexbox, with three div | |
| | | elements aligned horizontally. | |
| | | 5 Implement a media query that changes the | |
| | | background color of a webrage when the series | |
| | | background color of a webpage when the screen | |
| | | width is less than 600 pixels. | |
| | | 6. Write a JavaScript function that changes the text | |
| | | content of an HTML element with the id "demo" to | |
| | | "Hello World!" when a button is clicked | |
| | | field, worker when a button is cheked. | |
| | | 7. Declare a variable in JavaScript and assign it a | |
| | | string value. Also, mention the data type of the | |
| | | variable. | |
| | | | |
| | | 8. Write a JavaScript program for attaching a click | |
| | | event to a button. | |
| | | | |

| | 9. Use JavaScript to make an asynchronous request to a JSON file and display the data on the webpage. 10. Use JavaScript to perform AJAX operation | |
|---|---|---|
| 2 | Case Study | 2 |
| 3 | Project: Build a web application for perform responsive web application. | 8 |

Note: The syllabus has five modules. There should be total 22 units in the first four modules composed of the theory topics. The number of units in the last module can vary. There are 45 instructional hours for the first four modules and 30 hrs for the final one. Module V is designed to equip students with practical skills. The 20 marks for the evaluation of practical will be based on Module V. The end-semester examination for the theory part will be based on the 22 units in the first four modules.

| | 17 | RECEIVING DATA FROM HTML FORMS- Form | 2 | - | | | |
| | | creation. Understanding method \$ GET . \$ POST and | | | | | |
| | | \$ REOUEST. Receiving Data at Server. Sending Artificial | | | | | |
| | | data from HTML. Formated Response by PHP. Dynamic | | | | | |
| | | data manipulation. Handling Null Values. Generating | | | | | |
| | | Dynamic Web Page by HTML Input | | | | | |
| | 18 | WORKING WITH DATABASES AND FORMS- | 2 | | | | |
| | _ | Introduction to PHPMvAdmin Panel. PHP Database | | | | | |
| | | Creation, Understanding table structure, Go through with | | | | | |
| | | SQL Queries, CRUD operation in MySQL | | | | | |
| | 19 | Handling multiple tables in PHP-MySOL, MySOL Joins | 2 | | | | |
| | - | and Views. Importing and Exporting data through SOL | | | | | |
| | | script, Connectivity to remote server | | | | | |
| | 20 | CONFIGURING AND USING MYSOL- Fetching | 2 | | | | |
| | | MySOL data from PHP forms. Creating registration forms. | - | | | | |
| | | Managing secure Login Screens, Receiving Character and | | | | | |
| | | numeric indexes. Learn PHP SOL Functions. | | | | | |
| | | Implementation of all crud operation. Search data in | | | | | |
| | | MySQL, PHP Paging script | | | | | |
| | 21 | WORKING WITH PHP SESSIONS- Session Overview. | 2 | | | | |
| | | How Session works, Global Session Variables, Session and | | | | | |
| | | Array, Expiring Session, Session Storage | | | | | |
| | 22 | EXCEPTION HANDLING- Understanding PHP | 2 | | | | |
| | | exceptions and error handling mechanisms, Using try-catch | | | | | |
| | | blocks for exception handling | | | | | |
| V | | Open Module Practical | 30 | 30 | | | |
| | 1. Cre | eate a JavaScript program that prompts the user to enter their | 7 | | | | |
| | name | and then displays a greeting message using alert(). | | | | | |
| | 2. Wr | ite a JavaScript program that checks if a number entered by | | | | | |
| | the us | er is even or odd, and then displays the result. | | | | | |
| | 3. Wr | ite a JavaScript program that validates a user's email address | | | | | |
| | using | regular expressions. | | | | | |
| | 4. Cr | eate a JavaScript function that calculates the factorial of a | | | | | |
| | numb | er entered by the user. | | | | | |
| | 5. Write a JavaScript program that demonstrates the use of a | | | | | | |
| | callback function to perform asynchronous operations. | | | | | | |
| | 6. Write a JavaScript program that dynamically adds a new 8 | | | | | | |
| | parag | raph element to the HTML document when a button is | | | | | |
| | clicke | | | | | | |
| | /. W1 | rite a JavaScript program that uses ES6 features such as | | | | | |
| | arrow | iunctions and template literals to create a simple greeting | | | | | |
| | messa | ige. | | | | | |
| 1 | ∣ð. W1 | the a JavaScript program that demonstrates error handling | | | | | |

| using try-catch blocks when parsing JSON data. | | |
|--|---|--|
| 9. Write a JavaScript program that demonstrates debugging using | | |
| console.log statements to print the values of variables and objects. | | |
| 10. Write a JavaScript program that handles click events on a | | |
| button to toggle the visibility of a paragraph element. | | |
| 11. Demonstrate the installation of XAMPP or WAMP tools on a | 7 | |
| local development environment. Guide students through the | | |
| installation process and verify that the Apache and MySOL | | |
| servers are running correctly. | | |
| 12. Write a PHP script that displays "Hello, World!" on a | | |
| webpage. Embed the PHP script within HTML markup and save | | |
| the file with a .php extension. Verify that the PHP script executes | | |
| correctly when accessed through the local server. | | |
| 13. Write a PHP program that defines a function to calculate the | | |
| factorial of a given number. Test the function by passing different | | |
| values and displaying the results. | | |
| 14. Create an HTML form with input fields for name and email. | | |
| Write a PHP script that receives the form data, validates it, and | | |
| displays a confirmation message. | | |
| 15. Write a PHP program that demonstrates various operations on | | |
| arrays such as creating arrays, accessing array elements, adding | | |
| and removing elements, and sorting arrays. | | |
| 16. Create an HTML form for user registration with fields for | 8 | |
| name, email, and password. Write a PHP script to receive the | | |
| form data using the \$_POST method, validate it, and insert it into | | |
| a MySQL database. | | |
| 17. Use PHPMyAdmin to create a database and a table for storing | | |
| user registration data. Write PHP scripts to perform CRUD | | |
| operations (Create, Read, Update, Delete) on the database table, | | |
| allowing users to add, view, edit, and delete records through a | | |
| web interface. | | |
| 18. Create multiple tables in the database to represent related data | | |
| entities. Write PHP scripts to perform MySQL joins to retrieve | | |
| data from multiple tables and display it in a meaningful way on a | | |
| web page. | | |
| 19. Create a login form with fields for username and password. | | |
| Write PHP scripts to authenticate users against a MySQL | | |
| database, validate their credentials, and redirect them to a | | |
| dashboard page upon successful login. Implement secure | | |
| password hashing and salting techniques for user authentication. | | |
| 20. Implement PHP sessions to store and manage user | | |
| authentication status and other user-specific data across multiple | | |
| pages. Use try-catch blocks to handle exceptions and errors | | |
| gracefully, providing informative error messages to users while | | |
| preventing sensitive information leakage. | | |

| | 22 | Handling Errors and Exceptional Cases, API Versioning | 2 | |

| | and Documentation Best Practices | | |
|---|--|----|--|
| V | Open Ended Module: Practicum Component | 30 | |
| | Create a presentation discussing the importance of API design in facilitating integration between software systems. Include examples of well-designed APIs and explain how they contribute to developer productivity and system interoperability. Analyse different types of APIs based on their availability. Discuss the advantages and challenges associated with public, private, and partner APIs, and provide real-world examples of each type. Compare and contrast the SOAP and REST protocols, highlighting their key characteristics, advantages, and use cases. Evaluate which protocol is better suited for different scenarios, such as enterprise integration vs. web development. Develop a whitepaper outlining the key elements of API architecture, including endpoints, HTTP methods, data formats, security mechanisms, versioning strategies, and error handling practices. Discuss how each element contributes to building robust and scalable APIs. | | |
| | Use Postman to make GET, POST, PUT, and DELETE requests to a public API (e.g., JSONPlaceholder). Document the responses. Set up an Express server that listens on a port and responds with "Hello, World!" to a GET request. Create a RESTful API with CRUD operations for a simple resource Comprehensive RESTful API Project -Students will design and develop a complete RESTful API | | |

| | 16 | Introduction to micro-interactions and their role in | 1 | |
| | | enhancing user experience | | |
| | 17 | Usability testing methods: heuristic evaluation, A/B testing, and usability testing sessions | 3 | |
| | 18 | Analyzing user behaviour using analytics tools like Google Analytics | 2 | |
| | 19 | Prototyping and user testing - Creating interactive prototypes for user testing, Conducting usability tests with prototypes, Analysing user feedback, and iterating | 3 | |

| | on designs, Advanced prototyping techniques: high- | | |
|----|--|----|----|
| | fidelity prototypes, animations, and transitions | | |
| IV | ADVANCED TOPICS IN UI/UX FOR WEB DEVELOPMENT | 7 | 10 |
| | 20 Designing for multiple devices and platforms: mobile- first design approach - Designing for different screen sizes and devices, Mobile-first design approach and techniques, Mobile usability and touch interactions | 3 | |
| | 21 Integrating UI/UX design with front-end development workflows - Collaborating with front-end developers in implementing UI/UX designs, Translating designs into HTML, CSS, and JavaScript, Design handoff, and communication with developers. | 2 | |
| | 22 Performance optimization and Loading Speed - Techniques for optimizing web page loading speed, Image optimization, lazy loading, Minification and code optimization, Cross-browser compatibility, and performance optimization considerations | 2 | |
| V | Hands-on UI/UX: | 30 | |
| | Practicum Components | | |
| | Analyse the differences between UI (User Interface) and UX (User Experience) design principles. Discuss their respective importance in web development, providing examples of websites or applications that excel in both UI and UX. Research and present a case study on successfully implementing the user-centred design (UCD) process in a web development project. Describe the usability testing methods, user feedback collection techniques, and iterative design processes used to improve the user experience. Explore various wireframing tools and techniques available for UI/UX designers. Compare and contrast at least three tools, evaluating their features, usability, and suitability for different design projects. Create a presentation on the fundamentals of visual design, focusing on colour theory and typography. Discuss the psychological effects of different colours and fonts on user perception and mood, and provide examples of effective color schemes and typeface combinations in web design. | | |
| | Design a wireframe and information architecture for a hypothetical website or application. Demonstrate how you would organize and structure the content, create user flows, and design navigation patterns to optimize user experience and accessibility. Investigate the interaction design principles, including feedback, affordance, and signifiers. Analyse how these principles influence user interactions and interface design | | |

| decisions in popular websites or applications. | |
|---|--------------|
| 7. Develop a mobile-first design approach for a | responsive |
| website. Create wireframes and design mock ups that | t prioritize |
| mobile user experience, considering touch interaction | ons, screen |
| sizes, and performance optimization techniques. | |
| 8. Perform a performance optimization | audit on a |
| website or web application. Identify | areas for |
| improvement in terms of loading spec | ed, image |
| optimization, code minification, and cro | ss-browser |
| compatibility. Develop a plan for optim | nizing the |
| website's performance based on your finding | ngs |

Detailed Syllabus:

| Module | Unit | Content | Hrs (Max 48) | Marks (Max 70) |
|--------|---|---|--------------------|-------------------|
| Ι | Fund | amentals of Vector | 5 | 10 |
| | 1 | Introduction to vectors, Properties of vectors | | |
| | 2 | Vector Addition and Scalar Multiplication | | |
| | 3 Inner product | | | |
| | 4 Norm, distance, angle and projection of vectors | | | |
| II | Fund | amentals of Matrices | 10 | 15 |
| | 5 | Introduction to matrices | | |
| | 6 | Matrix Addition and Scalar Multiplication | | |
| | 7 | Matrix Multiplication | | |
| | 8 | Transpose of a matrix, Square matrix, Diagonal and Trace | | |
| | 9 | Orthogonal, Symmetric and Normal Matrices | | |
| | 10 | Invertible Matrices, determinants of matrices | | |
| III | Syste | m of Linear Equations | 14 | 20 |
| | 11 | Linear Equations and System of Linear Equations | | |
| | 12 | Coefficient and Augmented matrix | | |
| | 13 | Systems in triangular and echelon forms | | |
| | 14 | Solving Linear equations using matrix inversion | | |
| | 15 | Solving Linear equations using Gaussian elimination | | |
| | 16 | Eigenvalues and eigen vectors of matrix | | |
| IV | Intro | duction to calculus | 16 | 25 |
| | 17 | Overview of calculus and its importance in machine learning and data science. | | |
| | 18 | Functions- Definition and types of functions, Graphical representation of functions, Operations on functions. | | |
| | 19 | Limits -Understanding the concept of limits and evaluating limits algebraically and graphically | | |
| | 20 | Introduction to derivatives: definition and interpretation Derivatives of common functions: constant, linear, quadratic, | | |
| | 21 | cubic, inverse, trigonometric, exponential, logarithmic, and power functions | | |
| | 22 | Integration rules: power rule, substitution, and | | |
| | | integration by parts. | | |
| V | | Practical Applications | 30 | 30 |
| | 1 | Write Python programs for | | |
| | | 2 Perform matrix multiplication | | |
| | | 3. Find the determinant of a square matrix. | | |
| | | 4. Solve a system of linear equations using | | |

| Gaussian elimination. |
|---|
| 5. Find the eigenvalues and eigenvectors of a |
| square matrix. |
| 6. Calculate Frobenius norm of a matrix |
| 7. Find the inverse of a square matrix. |
| 8. Check if a given matrix is orthogonal. |
| 9. Calculate the trace of a square matrix. |
| 10. Calculate the nth-order derivative of a function. |
| 11. Find the definite integral of a function using |
| numerical methods |
| 12. Find the minimum or maximum value of a |
| function using optimization techniques (e.g., |
| gradient descent) |

| | | DESCRIPTIVE STATISTICS | 09 | | | | |
| | 1 | Concept of primary and secondary data, Methods of collection | 1 | | | | |
| Ι | 2 | Measures of central tendencies (Mean, Median, Mode, GM and HM) | 4 | 15 | | | |
| | 3 | Measures of dispersion, Relative Measures and Absolute Measures | 2 | | | | |
| | 4 | Range, Quartile deviation, Mean deviation, standard deviation, Variance | 2 | | | | |
| | | CORRELATION AND REGRESSION ANALYSIS | 10 | | | | |
| П | 5 | Principles of Least Squares and Exploratory data analysis (EDA) techniques: histograms, box plots, scatter plots. | 3 | | | | |
| | 6 | Pearson's Coefficient of Correlation | 2 | 15 | | | |
| | 7 | Rank Correlation | 2 | | | | |
| | 8 | Simple linear regression and multiple linear regression. Logistic regression for classification problems. | 3 | 3 | | | |
| | | PROBABILITY THEORY | 11 | | | | |
| | 9 | Random experiment, Sample point, Sample Space | 1 | | | | |
| | 10 | Events, Operation of events (Union, Intersection, Complement of Events) | 2 | | | | |
| | 11 | 11 Exclusive and exhaustive events, equally likely events with examples | | | | | |
| III | 12 | Classical approach to probability, Axiomatic definitions of probability, simple problems | 2 | 20 | | | |
| | 13 | Theorems of probability - Addition Theorem - Multiplication Theorem | 2 | | | | |
| | 14 | Conditional probability | 1 | | | | |
| | 15 | Inverse probability | 1 | | | | |
| | 16 | Baye's Theorem | 1 | | | | |
| | | THEORETICAL DISTRIBUTION | 16 | | | | |
| | 17 | Discrete and continuous random variables and probability distribution and Expectation | 3 | | | | |
| IV | 18Binomial distribution: Definition, Expectation, Variance, Moment Generating Function and Problems | | | 20 | | | |
| | 19 | Poisson distribution: Definition, Expectation, Variance, Moment Generating Function and Problems | 2 | | | | |
| | 20 | Normal distribution - Features and properties- Standard normal curve | 3 | | | | |

| | 21 | Normal distribution: Definition, Expectation, Variance, Moment Generating Function, Standard normal curve and Problems | 3 | |
|---|---|---|----|--|
| | 22 | Type of Testing: T-Test, ANOVA-Test, Chi-square test, Z- Test (Concept Only) | 2 | |
| | | Lab Activities (Use Sci Lab) | 30 | |
| | | Implements mean, median and mode hight of then students | | |
| | | Determine the standard deviation and variance | | |
| | | Plot a histogram to visualize the distribution | | |
| | | Create a variable 'x' and assign it the value 10. Display the value of 'x'. | | |
| | Y S H C Y S 1 C S | You have a dataset containing the number of hours students spent studying and their corresponding scores in an exam. Perform linear regression to predict the exam scores based on the number of hours studied | | |
| V | | You are given two arrays representing the scores of students in two subjects, Math and Science. Calculate the correlation coefficient between the scores in Math and Science. | 20 | |
| | | Perform simple linear regression and using the principles of least squares in SciLab. | | |
| | | Suppose you toss a fair coin 10 times. Simulate the experiment and calculate the probability of getting exactly 5 heads. | | |
| | | Create a SciLab function to simulate random experiments and calculate probabilities of events | | |
| | | Compute the expectation, variance distributions for given parameters (Binomial and Poisson). | | |
| | 2 | Case Study | 2 | |
| | 3 | Develop a predictive model using statistical techniques and tools for identifying a real-world problem in data science. | | |

Detailed Syllabus:

| Module | Unit | Content | Hrs | Marks |
|--------|------|---|---------|-------|
| | | | (45+30) | (70) |
| Ι | I | NTRODUCTION TO DATA ANALYTICS & EXCEL | 10 | 15 |
| | 1 | Application of data modelling in business. | 2 | |
| | 2 | Databases and types of Data variables. | 2 | |
| | 3 | Data analytical techniques, Need of Data Analytics. | 2 | |
| | 4 | Introduction to Excel, Understanding Worksheet Basics. | 2 | |
| | 5 | Perform Functions with Shortcut Keys, Formulas and Functions. | 2 | |
| II | | DATA VISUALIZATION | 15 | 20 |
| | 6 | Introduction to Data visualization. | 1 | |
| | 7 | Chart types – Gantt & Milestone Chart. | 2 | |
| | 8 | Smart art & Organization chart. | 2 | |
| | 9 | Get creative with Icons. | 2 | |
| | 10 | 3D models. | 2 | |
| | 11 | Digital Inking. | 2 | |
| | 12 | Putting Data in perspective with Pivots. | 4 | |
| III | | DATA-DRIVEN TECHNIQUES | 10 | 20 |
| | 13 | Summarize Marketing Data: Slicing and Dicing Marketing Data with PivotTables. | 2 | |
| | 14 | Using Excel Charts to Summarize Marketing Data - Using Excel Functions to Summarize Marketing Data. | 1 | |
| | 15 | Simple Linear Regression and Correlation. | 2 | |
| | 16 | Using Multiple Regression to Forecast Sales. | 2 | |
| | 17 | Copernican Principle to Predict Duration of Future Sales Viral Marketing, Text Mining. | 3 | |
| IV | | FORECASTING IN EXCEL | 10 | 15 |
| | 23 | Forecast Sheet, One-click forecasting. | 2 | |

| | 24 Create Forecast Worksheet. | | 2 | |
|---|-------------------------------|--|----|--|
| | 25 | Customize Forecast using Options. | 2 | |
| | 26 | FORECAST Functions, FORECAST.ETS, FORECAST.ETS.CONFINT, FORECAST.ETS.STAT | 2 | |
| | 27 | What-if Analysis Tools, Scenario Manager, Goal Seek, Data Table, Solver Add-In. | 2 | |
| V | | Practical Applications using Excel | 30 | |
| | | Implement the following: | 30 | |
| | | Getting Started with Excel: Creation of spread sheets, Insertion of rows and columns, Drag & Fill, use of Aggregate functions. | | |
| | | Working with Data : Importing data, Data Entry & Manipulation, Sorting & Filtering. | | |
| | | 3. Working with Data: Data Validation, Pivot Tables & Pivot Charts. | | |
| | | 4. Data Analysis Process: Conditional Formatting, What-If Analysis, Data Tables, Charts & Graphs. | | |
| | | 5. Cleaning Data with Text Functions: use of UPPER and LOWER, TRIM function, Concatenate. | | |
| | | 6. Cleaning Data Containing Date and Time Values: use of DATEVALUE function, DATEADD and DATEDIF, TIMEVALUE functions. | | |
| | | 7. Conditional Formatting: formatting, parsing, and highlighting data in spreadsheets during data analysis. | | |
| | | 8. Working with Multiple Sheets: work with multiple sheets within a workbook is crucial for organizing and managing data, perform complex calculations and create comprehensive reports. | | |

| 9. Create worksheet with following fields: Empno, Ename, Basic Pay(BP), Travelling Allowance(TA), Dearness Allowance(DA), House Rent Allowance(HRA), Income Tax(IT), Provident Fund(PF), Net Pay(NP). Use appropriate formulas to calculate the above scenario. Analyse the data using appropriate chart and report the data. | |
|---|--|
| 10. Create worksheet on Inventory Management: Sheet should contain Product code, Product name, Product type, MRP, Cost after % of discount, Date of purchase. Use appropriate formulas to calculate the above scenario. Analyse the data using appropriate chart and report the data. Template for Practical Course and if AEC is a practical Course Annexure-V | |
| 11. Create worksheet on Sales analysis of Merchandise Store: data consisting of Order ID, Customer ID, Gender, age, date of order, month, online platform, Category of product, size, quantity, amount, shipping city and other details. Use of formula to segregate different categories and perform a comparative study using pivot tables and different sort of charts. | |
| 12. Generation of report & presentation using Autofilter ¯o. | |

Course Outcomes (CO): .

| СО | CO Statement | Cognitive | Knowledge | Evaluation |
|-----|---|-----------|-----------|--|
| CO1 | Students will demonstrate proficiency in managing spreadsheets, including creating, formatting, and manipulating data within Excel workbooks. They will be able to effectively navigate Excel's interface and utilize toolbars. | U | P | Instructor- created exams / Quiz |
| CO2 | Learners will understand the importance of data organization and cleansing in Excel. They will be able to import, export, filter, sort, validate, and remove duplicates from datasets. Students will develop skills to ensure data integrity and consistency, enhancing their ability to work with clean and organized data sets. | U | Р | Instructor- created exams/ Home Assignments |
| CO3 | Participants will acquire advanced data analysis skills like pivot tables, what-if analysis, and goal seek. They will be able to apply various Excel functions and tools to perform complex calculations, analyze trends, and make informed decisions based on data analysis. | Ар | Р | Instructor- created exams |
| CO4 | Students will gain proficiency in data visualization techniques using Excel. They will be able to create a variety of | Ар | Р | Instructor- created exams |
| | charts, design pivot charts, dashboards for effective data analysis. Additionally, learners will be able to implement form controls for interactive data manipulation in their visualizations. | | | | |
|--|--|----|---|------------------------------|--|
| CO5 | Learners will develop skills in advanced features of Excel like macros, protect data sheets and workbooks, utilize split, freeze, and hide options effectively, incorporate add-ins for extended functionalities, and manage printing options in Excel for professional presentation of data. | Ар | Р | Instructor- created exams | |

| | 21 Dashboards | 2 | |
| | 22 Form Controls | 4 | |
| V | Hands-on Spreadsheets | 30 | 30 |
| | Spreadsheet Basics: | | |
| | 1. Create a new workbook in Excel. | | |
| | 2. Identify and label different parts of the Excel window, such as the | | |
| | Ribbon, Formula Bar, Name Box, and Worksheet Tabs. | | |
| | 3. Insert and delete cells, columns, and rows within a worksheet. | | |
| | Formatting: | | |
| | 4. Merge cells and wrap text within merged cells. | | |
| | 5. Experiment with different font styles, sizes, and colours for text | | |
| | formatting. | | |
| | 6. Apply various number formatting options (e.g., currency, | | |
| | percentage, date) to cells. | | |
| | Panga Operations: | | |
| | Kange Operations: 8 Use Autofill to quickly populate a series of cells with data (e.g. (a, b)) | | |
| | numbers dates text) | | |
| | 9. Utilize Autosum to calculate the sum of a range of numbers | | |
| | automatically. | | |
| | 10. Practice relative, absolute, and mixed referencing in formulas to | | |
| | understand their impact on cell references. | | |
| | 11. Link data between different worksheets within the same | | |
| | workbook. | | |
| | Formulas and Functions: | | |
| | 12. Experiment with different mathematical formulas (e.g., addition, | | |
| | subtraction, multiplication, division) using the Formula Bar. | | |
| | 13. Apply common functions such as SUM, ROUND, CEIL, | | |
| | FLOOK, IF, AND, OK, AVERAGE, MIN, MAX, COUNT, COUNTIF, | | |
| | analyse data sets | | |
| | 14 Combine functions within formulas to perform more complex | | |
| | calculations. | | |
| | Data Import and Export: | | |
| | 15. Import external data from sources such as CSV files, text files, or | | |
| | databases into Excel. | | |
| | 16. Export Excel data to different formats (e.g., CSV, PDF) for | | |
| | sharing or further analysis. | | |
| | Filtering and Sorting: | | |
| | 17. Filter data to display specific records based on criteria (e.g., | | |
| | dates, categories, numerical ranges). | | |
| | 18. Sort data alphabetically, numerically, or chronologically to | | |
| | analyse trends or identify patterns. | | |

| 9. Implement data validation rules to restrict input values within pecified criteria (e.g., date ranges, numerical limits, list selections). 20. Identify and remove duplicate records from a dataset while preserving unique data entries. 21. Group related rows or columns together to organize data dierarchically. 22. Perform subtotal calculations within grouped data to summarize information at different levels of detail. 23. Apply conditional formatting using highlight cell rules to visually dentify data outliers, trends, or exceptions. 24. Utilize top/bottom rules to highlight top or bottom values within a lataset for quick analysis. 25. Import a dataset into Excel and create a pivot table summarizing ey metrics (e.g., sales revenue, product quantities) by different limensions (e.g., region, product category). 26. Experiment with different pivot table configurations (e.g., adding |
|--|
| pecified criteria (e.g., date ranges, numerical limits, list selections). 20. Identify and remove duplicate records from a dataset while breserving unique data entries. Grouping, Ungrouping, and Subtotal: 21. Group related rows or columns together to organize data dierarchically. 22. Perform subtotal calculations within grouped data to summarize anformation at different levels of detail. Conditional Formatting: 23. Apply conditional formatting using highlight cell rules to visually dentify data outliers, trends, or exceptions. 24. Utilize top/bottom rules to highlight top or bottom values within a lataset for quick analysis. Pivot Table Creation: 25. Import a dataset into Excel and create a pivot table summarizing ey metrics (e.g., sales revenue, product quantities) by different limensions (e.g., region, product category). 26. Experiment with different pivot table configurations (e.g., adding |
| 20. Identify and remove duplicate records from a dataset while preserving unique data entries. Grouping, Ungrouping, and Subtotal: 21. Group related rows or columns together to organize data dierarchically. 22. Perform subtotal calculations within grouped data to summarize information at different levels of detail. Conditional Formatting: 23. Apply conditional formatting using highlight cell rules to visually dentify data outliers, trends, or exceptions. 24. Utilize top/bottom rules to highlight top or bottom values within a lataset for quick analysis. Pivot Table Creation: 5. Import a dataset into Excel and create a pivot table summarizing ey metrics (e.g., sales revenue, product quantities) by different limensions (e.g., region, product category). 26. Experiment with different pivot table configurations (e.g., adding |

| |
| polouloted fields, grouping data, groating hierorchical rows/columns) to |
| actuated fields, grouping data, creating incratence rows/columns/ to |
| and insights into the dataset. |
| Itting Linear Regression in Excel: |
| ./. Import a dataset containing variables for linear regression |
| narysis (e.g., independent and dependent variables). |
| 8. Use Excels built-in regression analysis tool to lit a linear |
| nd acadrass of fit massures |
| nd goodness-of-int measures. |
| Creating Charts from Regression Analysis: |
| 9. Perform linear regression analysis on a dataset containing |
| ndependent and dependent variables. |
| 0. Create a scatter plot chart to visualize the relationship between |
| he variables, including the regression line and confidence intervals. |
| Pivot Chart: |
| 1. Create a pivot chart based on a pivot table summarizing key |
| netrics from a dataset. |
| 2. Customize the pivot chart to display data trends and patterns |
| lynamically as the underlying pivot table data is updated. |
| Dashboards: |
| 3. Design a dashboard incorporating multiple charts and pivot tables |
| o provide a comprehensive overview of business metrics or performance |
| ndicators. |
| 4. Use interactive features such as slicers and timeline controls to |
| nable users to filter and analyse data dynamically. |
| Form Controls: |
| |
| 5. Add form controls such as checkboxes. dropdown lists. and |
| 5. Add form controls such as checkboxes, dropdown lists, and ption buttons to interact with charts and pivot tables. |
| Add form controls such as checkboxes, dropdown lists, and bottom buttons to interact with charts and pivot tables. Create interactive features allowing users to customize chart |

| Course Summary | This course ex current digita technologies, au and importanc security consid personal and p infrastructure, applications. | This course explores the evolution from pre-digital challenges to the current digital landscape, covering historical milestones, key technologies, and the vision of Digital India. It emphasizes the benefits and importance of digital revolution while addressing ethical and security considerations. Participants engage with digital tools for personal and professional growth and examine case studies on digital infrastructure, missions, and services to understand real-world applications. | | | | | |

Course Outcomes (CO):

| CO | CO Statement | Cognitive Level* | Knowledge Category# | Evaluation Tools used |
|-----|--|---------------------|------------------------|--|
| CO1 | Students will be able to analyse the challenges of the pre-digital age and comprehend the importance and benefits of digital revolution, facilitating a deeper understanding of technological evolution. | An | F | Instructor- created exams / Quiz |
| CO2 | Participants will gain familiarity with key digital technologies like Cloud Computing, IoT, AI, and Blockchain, equipping them with the knowledge to identify their applications and potential benefits in different sectors. | U | С | Instructor- created exams/ Home Assignments |
| CO3 | Students will develop insights into Digital India initiatives and emergence of Kerala as Digital Society | U | С | Instructor- created exams |
| CO4 | Through exploration of digital tools | Ар | Р | Instructor- |

| | for personal and professional growth, students will enhance their digital literacy and ability in utilizing tools for data sharing, online learning, networking, and content creation, empowering them to thrive in the digital age. | | | created exams | | | |
|--------|--|----------------|-----------------|------------------------------|--|--|--|
| CO5 | Learners will become aware of ethical and security considerations in the digital age, including privacy concerns, Intellectual Property Rights, key terminologies related to cyber security, and an introduction to cyber laws in India, fostering responsible digital citizenship. | U | C | Instructor- created exams | | | |
| CO6 | Students will analyse real-world case studies of digital infrastructure projects, digital missions, and digital services to demonstrate a comprehensive understanding of the practical applications and implications of digital technologies in various contexts, fostering critical thinking and strategic decision- making skills in digital transformation initiatives. | An | С | Instructor- created exams | | | |
